Canadian Hospital Association

ONE SOURCE FOR OVER HUNDRED QUALITY TEXTILE PRODUCTS UTILIZED IN HOSPITAL OPERATION . . . COAST-TO-COAST.

TWO ALL SHIPPED PREPAID TO DESTINATION. NO DISCOUNTS TO COMPUTE—NO ADDITIONAL CHARGES TO PAY.

THREE DECADES (PLUS) IN THIS SPECIALIZED FIELD GIVE GUARANTEED VALUE—GUARANTEED SATISFACTION.

FOUR EXCLUSIVE ITEMS BELOW ARE OBTAINABLE FROM NO OTHER CANADIAN SUPPLIER . . . TYPICAL LEADERSHIP FROM—

Lac-Mac

The Bed-der Gown —no ties, no ironing. This is the light, long-lasting bedgown that patients like to wear. Made from crinkle plissé (seersucker) in white and pastels. It saves dollars in the laundry.

EYEREST *Green* —the proven, popular grey-blue pastel that is both practical and pleasant in use. It cuts glare reflection two-thirds, eliminates green after-images, has complementary balance and is lower in cost.

LAMEL DRESSING GOWN—the soft, yet durable, cotton cloth used is woven specially for this product. It is sanforized. A vat-dyed glen-check in blue and grey—will not mat or harden. It's "the answer" and economical too.

NURSE'S SURGERY CAP—the patented snood cap (illustrated above) that is seven ways superior. It is stocked in net or sanforized shirting with elastic or drawstring closure—is now the standard required in many operating rooms.

WRITE LAC-MAC LTD. AT LONDON FOR CATALOGUE, PRICE LIST, SAMPLES OR FURTHER INFORMATION

Preface

WITH THE co-operation of people in hospitals, associations, educational programs, and our advertisers, the Canadian Hospital Association published the first edition of the *Canadian Hospital Directory* in 1953. Conceived as a service to the field, the directory was designed to fulfil a variety of purposes by offering several types of information under one cover for ready reference.

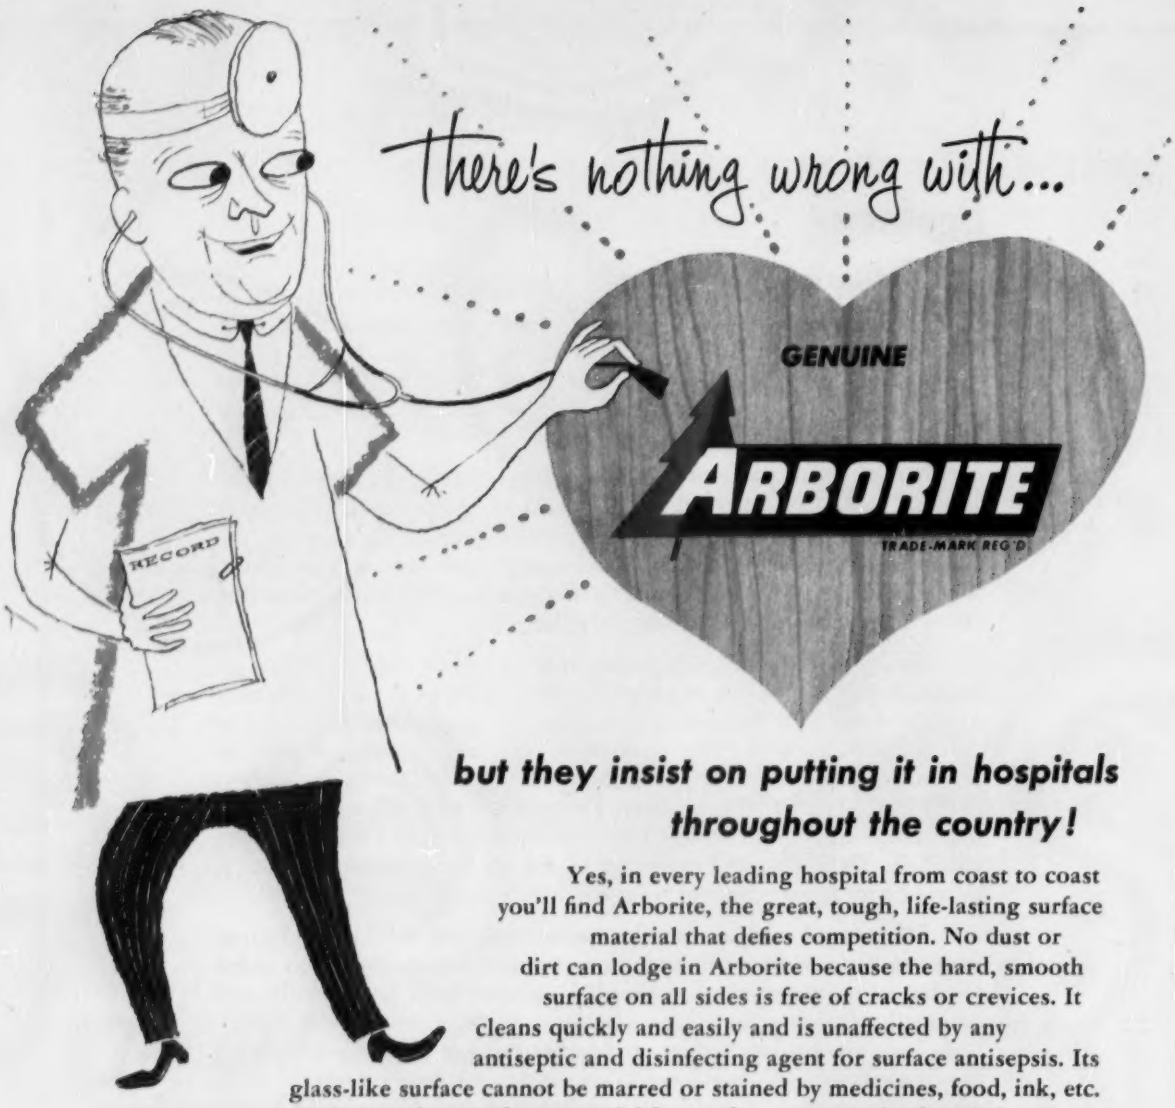
Although many excellent directories have been published by other hospital associations and by departments of government, none were planned specifically to offer Canadian hospitals the information obtained in the directory sections on hospital and nursing institutions, educational programs for hospital personnel, hospital associations and allied organizations, and the buyers' guide.

Because of rapid development in the hospital field, statistics on hospitals quickly become outdated. In the preface of the first edition it was stated that if the directory proved useful, it would be continued as an annual publication. The response to the first edition has been so favourable that a second has been compiled one year later with revisions in the listings and additional data. The rapid growth of hospital service in Canada continues to outdate some statistics almost as soon as they are obtained. Thus, despite every care to list all information accurately, we apologize for any inaccuracies which may be noted.

The second edition contains corrections and additional listings under the four original headings. Some tabular listings have been added to give total information on hospital services both provincially and nationally. Improvements have also been made in response to suggestions from our readers and by virtue of experience gained in producing the first edition. Although the 1953 cover was purposely designed to resemble the colour and motif of *Canadian Hospital*, many found this to be a disadvantage in locating the directory among copies of the Journal. Accordingly, the new cover and those to follow will be in contrasting colours. A heavier weight of paper has been used to lessen transparency and thereby provide improved readability. Tinted paper has been employed in three sections so that the reader may now more easily locate the various sections of the directory.

Other improvements are in view for future editions. However, it is only by knowing the readers' opinions that we may be guided in this work. We would urge that those using the directory communicate with us so that, if possible, their ideas for improvement of the directory may be employed.

The Canadian Hospital Association once more gratefully acknowledges the assistance of hospital administrators, hospital and allied organizations, departments of government, and the support of advertisers, all of whom made it possible to create the first edition and to produce up-to-date information for this annual revision.



but they insist on putting it in hospitals throughout the country!

Yes, in every leading hospital from coast to coast you'll find Arborite, the great, tough, life-lasting surface material that defies competition. No dust or dirt can lodge in Arborite because the hard, smooth surface on all sides is free of cracks or crevices. It cleans quickly and easily and is unaffected by any antiseptic and disinfecting agent for surface antisepsis. Its glass-like surface cannot be marred or stained by medicines, food, ink, etc. It is truly a modern material for modern, progressive hospitals. For years and years of trouble-free service on both vertical and horizontal surfaces, specify *Genuine* Arborite. You have a choice of 60 colours and patterns.

Wide Variety of Hospital Uses

Dining room and cafeteria table tops • Kitchen counter tops and splashbacks • Laboratory table tops (many prefer ¾" solid Arborite) • Bedside table tops • Walls and many other surfaces in Nurses' stations, corridors, auditoriums, X-ray trailers, pharmacies, etc.

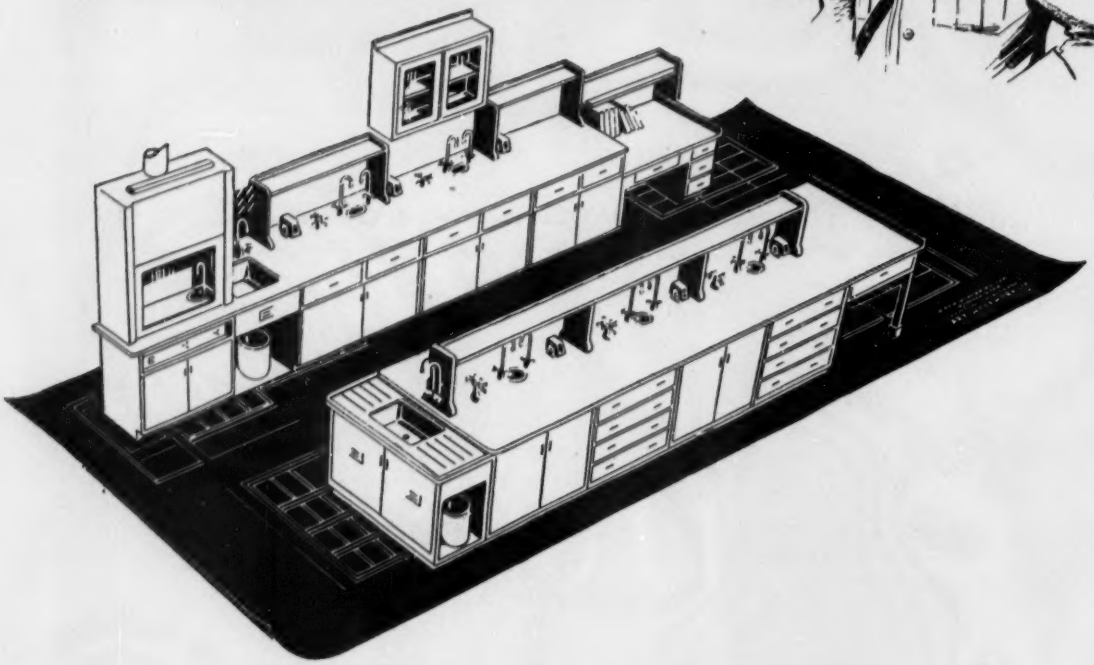
When planning a laboratory...

use a *CANADIAN CATALOGUE*



Equipment Planning and Consulting Service

A variation of even a few inches in the location of any of the main service line outlets leading into a laboratory can disrupt an entire arrangement.

Because all these service lines *must* fit, in their proper relationship, within the framework of the cabinet, *the importance of early planning* to assure the proper positioning of the outlets is readily understandable.

Our planning Department is designed to render this service. In its files are over 1,300 equipment layouts reflecting the experience of chemists, educators and architects and demonstrating the continuing development of efficient layout in relation to modern laboratory technique.

You may benefit from this composite experience.

Our representative will study your requirements with you and plans will be drawn showing suggested equipment and arrangement in conformity with his report.

NO PURCHASER OR PROSPECTIVE PURCHASER BEARS ANY OF THE EXPENSE OF THIS SERVICE—its maintenance is covered by a definite appropriation for development and research.

Write us whenever we can be of assistance.

INSTALLATION SERVICE

Art Woodwork experts are available to supervise complete installation. Ask our representative.

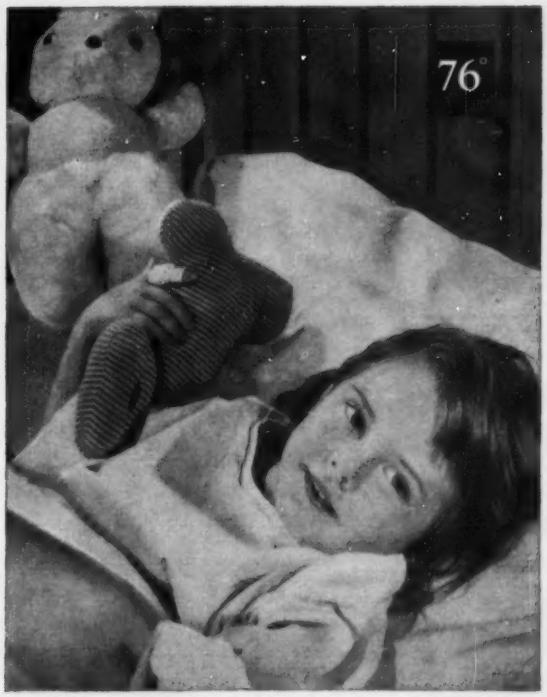
AIRFOAM—T.M. The Goodyear Tire & Rubber Company of Canada Limited



IN ROOM 408, this active child is convalescing from a minor operation. Since this hospital has Individual Room Temperature Control, the temperature can be set at 76°, assuring proper comfort —even though she kicks off her blankets.

IN ROOM 303, this adult's physician feels 70° will prove beneficial to her recovery. That's why it's important to have a Honeywell Hospital Thermostat in each room—for then, room temperatures can be part of the prescription.

a thermostat in
every room is a

MARK OF A MODERN HOSPITAL

Today, in many modernly equipped hospitals, it is routine medical practice to give each patient the exact room temperature he needs to speed his convalescence. And this can be done *only* by having a thermostat in every room. No other method can compensate for the varying effects of wind, sun, open windows and variations of internal load in each room. That's why it's so important to consider Individual Room Temperature Control if you're planning to build or modernize a hospital.

Be sure you plan to install Honeywell Individual Room Temperature Control when your hospital is being built. This is the most economical time to have it done. And contrary to most beliefs, Individual Room Temperature Control is not expensive, for most installations will cost only between ½ and 1% of the total building expenditure.

For complete facts on Honeywell Controls for your hospital, call your local Honeywell office—there are 14 in key cities throughout the nation. Or for literature, write Honeywell, Dept. CH4, Leaside, Toronto 17.

First thermostat specially designed for hospitals!

You get *all* these features only on a Honeywell Hospital Thermostat:

"*Nite-Glowing dials*" permit inspection without disturbing patients.

Magnified Numerals make readings easy to see.

New Speed-Set Control Knob is camouflaged against tampering.

Air-operated; requires no electrical connections.

Lint-Seal insures trouble-free, dependable operation.

GREENHOUSES and SOLARIUMS

Solarium on the roof of the Queen Elizabeth Hospital, Toronto.

The value of sunshine and living plants to convalescents and shut-ins both from a physical and psychological standpoint has long been recognized by medical authorities. Solariums and greenhouses where such therapy can be carried on throughout the year have become an important part of hospitals and institutions throughout the Dominion. At hospitals, they are furnished comfortably for use by the various patients. In psychiatric and neurological institutions, homes for the aged, etc., standard growing houses are frequently used.

Call on us for anything needed in glass structures. We manufacture a wide variety of standard styles and types as well as "custom" designs to meet the requirements and conditions of the individual. Problems particular to hospital and institutional construction are a specialty with us. Glad to collaborate with plans, specifications, and quotations.

TYPE "E" STOKER

One of the best-known, most widely-used stokers in the world, the Type E Combustion Engineering unit shown here is built to give many years of dependable, low-cost service. Records show that many Type E installations have lasted more than 30 years.

This single retort, underfeed stoker is designed to burn either coking or non-coking bituminous coal, and is applicable to boilers ranging from 150 to 600 rated boiler h.p.

Equipped with integral steam piston, or hydraulic drive, the Type E Stoker has a ram feed supplemented by a reciprocal sliding bottom, and an air supply under zoned control, with provision for introducing air over the fire.

STOKERS *MADE BY*
COMBUSTION ENGINEERING

- LOW RAM
- SKELLY
- CONTINUOUS DISCHARGE
- TYPE "E"
- SPREADER
- CHAIN-GRATE
- TRAVELLING GRATE

Coupled with dependability, long life and low maintenance cost, other virtues of the Type E Stoker are its easy installation, and the minimum of attention necessary because of its uniform feed, even distribution of coal, and quick elimination of ash.

Have you "Combustion Engineering" by Otto de Lorenzi, the text universally accepted by Universities, consulting engineers, steam plant operators and all those in the steam plant field? We have a supply of texts on hand at a nominal price.

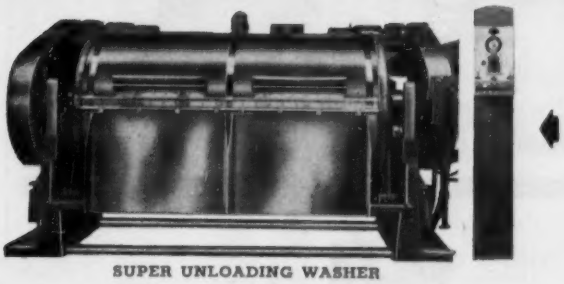
FOR GREATER EFFICIENCY ALL THROUGH YOUR LAUNDRY!



SUPER UNLOADING WASHER

SUPER EQUIPMENT is . . . Ruggedly Designed; Engineered to End Expense; Refined to eliminate waste motion; Priced to Fit Your Budget without sacrificing quality.

BEFORE YOU INVEST . . . INVESTIGATE THE SUPER LINE.

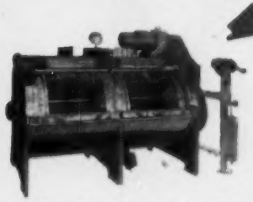
SUPER-TROL

An amazingly simple, dependable control which produces big savings in time, labor and supplies. Times all cycles accurately, performs every necessary operation from start to finish except adding supplies. Eliminates waste of steam, water and electricity.

CYCLE-TROL

A convenient low-cost control. Automatically closes and opens dump valve pneumatically . . . counts cycles and signals end of cycle with both light and alarm. Prevents over-washing, saves time and electric power.

WASHING . . .



"QWIK-OUT" Unloading Washer with horizontal removable partitions.

For peak efficiency in minimum space, here's the new SUPER UNLOADING WASHER (above) with pneumatic-powered "turnover". Boosts washing speed and capacity tremendously. Automatic or semi-automatic controls . . . one or two speed . . . AC or DC . . . single or double-end drive . . . in 42", 54" and 60" dia., all standard lengths . . . all stainless steel.

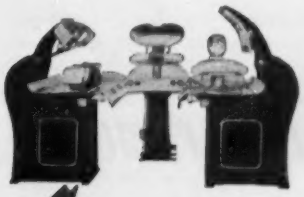
For conventional washing methods, SUPER METAL WASHERS are offered with removable horizontal metal partitions for easy unloading, or in standard open pocket design. Heavy stainless steel, offered in thirty sizes, in all standard lengths—30", 36", 42", 60" dia. . . . push-button controls . . . open and Y-types . . . one to 12 pockets . . . 60 to 900 lbs. dry capacity. Automatic or semi-automatic controls.

EXTRACTING

UNLOADING . . .

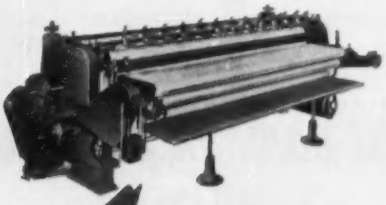
OPEN TOP . . .

The SUPER 54" and 50" Unloading Extractors and the 48" and 30" Open-top Extractors feature underdriven design . . . smooth acceleration . . . deceleration . . . positive safety cover interlock . . . all-steel outer curb . . . electric self-actuating brake . . . selective timer . . . choice of stainless steel or Monel metal . . . 80 lb. to 400 lb. capacities.



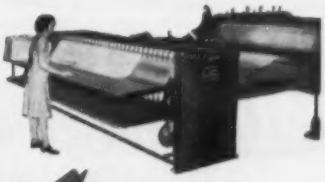
PRESSING . . .

Air-powered *SUPER AJAX LAUNDRY PRESSES* deliver outstanding production records and superb quality. Fast-action mirror-finished steel heads exert tremendous pressure. Matched shirt and linen supply units, plus all other head and buck styles. Two-hand safety controls.



IRONING . . .

Choose *SUPER CHEST-TYPE FLATWORK IRONERS* in 2, 4, 6 or 8 roll sizes for any desired capacity. Two-roll size available in return-apron model where floor space is limited. Or choose the famous *SUPER CYLINDER IRONERS* in 1, 2 or 3 cylinder sizes . . . both sides ironed in one pass!



FOLDING . . .

For large flatwork volume, *SUPER AUTOMATIC FOLDERS* with electric-eye operation deliver enormous savings . . . fold 12 to 16 sheets per minute direct from ironers with only one girl receiving. Handles flatwork from 30" to 90" range; by-passes out-of-range articles automatically. Adaptable to almost any type of flatwork ironer.

ALL SUPER EQUIPMENT built to rigid Federal specifications. Get genuine SUPER parts and service.

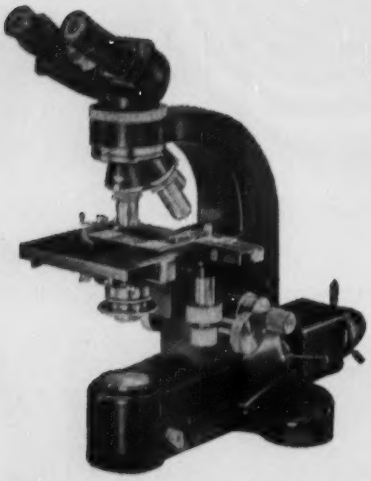
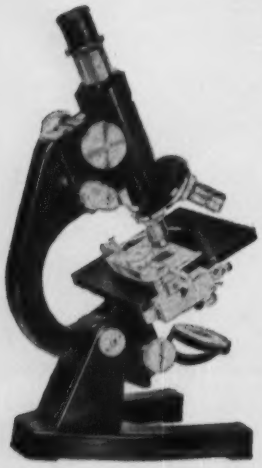
Institutional Laundry Specialists

NEWMARKET **PHONE 1197** **ONTARIO**



The new "DIALUX" Microscope with built-in illumination. Greatly in demand by pathologists.

Standard Laboratory Microscope model BST-48/79 with inclined binocular eyepieces. Cheaper than Dialux. For use in smaller hospitals.



Standard Monocular Microscope model GT-26/92 for the medical student and practicing physician.

"PANPHOT" Photomicrographic Apparatus — combined microscope and camera.

Leitz—the greatest name in precision instruments

Leitz Microscopes, *manufactured for more than 100 years,* are recognized the world over as precision instruments of highest quality that embody the latest improvements optical science can provide.

Precision and quality are the dominating factors in the manufacture of Leitz microscopes. These universally respected standards are carefully maintained through vigorous and constant inspection.

As the owner of a Leitz Medical Microscope, you are assured of efficient, precise service during a lifetime of use. Each instrument is guaranteed against any defect in optical or mechanical construction. *Here in Canada, we maintain complete mechanical and optical repair facilities* so that you can always be sure of genuine parts and expert workmanship.

INFORM CONTROL

(Infant Formula 230° Control)

Before After

An Aid in Control of Infant Diarrhoea

Terminal processing of formula at 230° requires a time factor of 10 minutes. Such a short period is recommended because of possible damage to the milk. The danger in use of such a *short* 10 minute exposure at 230° (general autoclaving requires 30 minutes at 250°) can be offset by use of new Inform Controls. Thus if the milk is slow in heating inside the bottles Informs will tell you. If your autoclave is not highly efficient and the thermometer is incorrect Informs will tell you.

In general you will find Informs as necessary as Diacks because you are working on *"the edge of sterilization"*.

FREE Samples upon Request — from your dealer or—from the manufacturer.

DIACK CONTROL

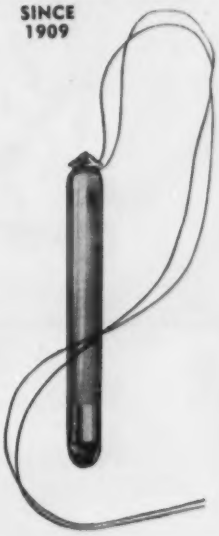
(GENERAL PURPOSE 250° CONTROL)

POSITIVE PROOF OF STERILIZATION

SINCE 1909

The Diack Control

is a fusible tablet hermetically sealed in glass. The sealed-in tablet will melt only when subjected to a sterilizing temperature and is not affected by age, storage or any other possible condition.



Diack

How the Diack Control Works

One Diack is placed in the Center of each of the largest and densest packages in the autoclave so that the attached threads remain visible. When the Autoclaving is completed, the door is opened and the glass tubes are pulled out by means of the attached threads. If the tablets are melted the sterilizing temperature has penetrated to the centers of the packages.

Diack Controls should be used also with sterilization of rubber goods and liquids (except infant formulas).

IT IS IMPOSSIBLE TO PROVE HEAT PENETRATION BY *ANY KIND OF OUTSIDE GAUGE OR THERMOMETER

DIACK CONTROLS ARE PACKED 100 TO THE BOX
WHITE OR BLACK THREAD IS OPTIONAL

*Other than a Thermocouple which is impractical for routine sterilization.

Kalyx cold drink cups

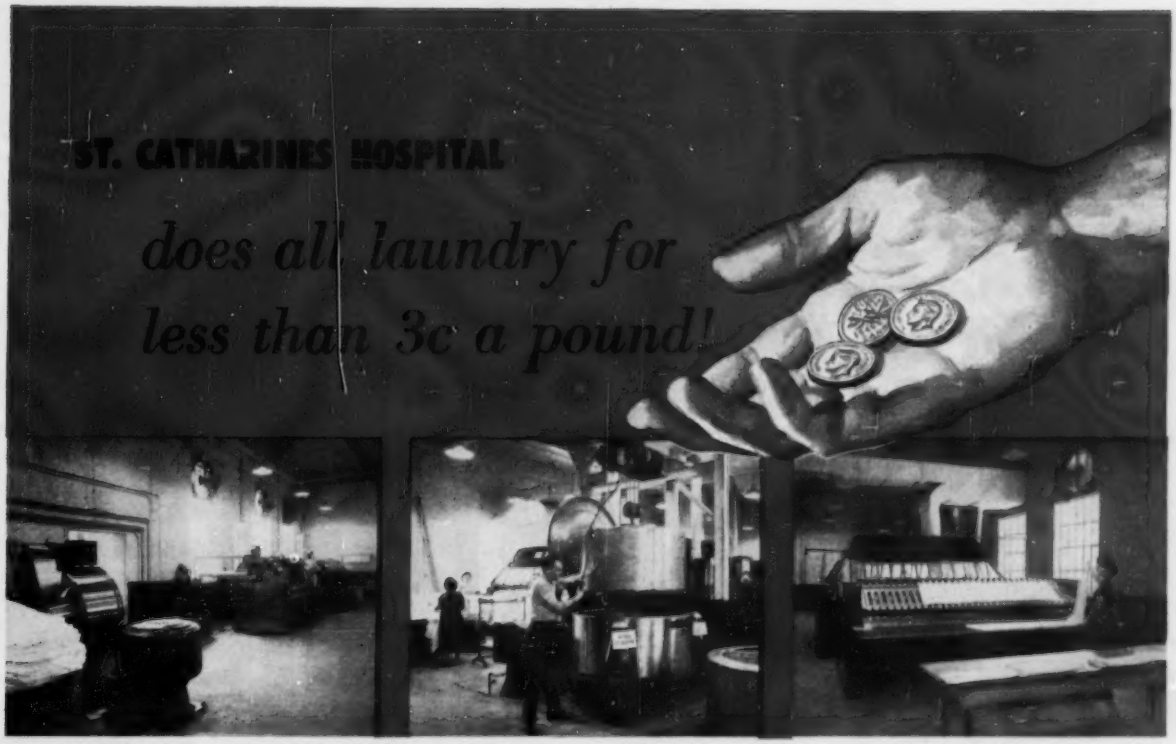
PREFERRED ...

for use in Canadian hospitals!

Kalyx cold drink cups are used in many Canadian hospitals where a sanitary, easily-disposable drinking cup is needed for morning fruit-drinks or evening relaxants. Kalyx Cups are handy . . . easily stored in large quantities. They're economical, too. Their construction is sturdily dependable. Order from your wholesale dealer or contact Globe Envelopes Ltd., Toronto.

Made by GLOBE ENVELOPES Limited

1070 QUEEN ST. E., TORONTO, ONTARIO



Efficient, Canadian-equipped laundry at St. Catharines General Hospital, St. Catharines, Ontario. At left foreground, Front-Loading Cascade Washer and Solid Curb Extractor for small lots. Beyond are two Cascade Unloading Washers with Full Automatic Controls for mass production of large loads.

Push-button operated electric hoist lowers loaded containers into Notrux Extractor. Load changing is fast, saves labor and idle machine-time.

Linens for 425-bed St. Catharines Hospital are quickly, neatly and automatically folded on Trumatic Folder. Folder is at delivery end of 6-Roll Super-Sylon Flatwork Ironer, equipped with Airvent Canopy.

That's right! Everything! Bed, kitchen, table and surgical linens, towels and blankets, clothes and uniforms—completely and hygienically washed, dried and ironed for less than 3c a pound!

All over Canada, hospitals like St. Catharines are winning the battle against rising costs with Canadian Laundry Machinery Co. planning and equipment. They've found that Canadian equipment combines efficiency with speed, thrift with ease of operation. They've found, too, that with a Canadian-equipped laundry they're sure of 365 days a year service—year after year!

When you plan a new laundry installation, or modernization or rearrangement of your present facilities, call in Canadian. Your Canadian Laundry Consultant will survey your clean linen requirements, recommend the right equipment, most efficient layout . . . all without cost or obligation to you. Write or call for his services—today!

You can depend on your Canadian Laundry Consultant's advice in your selection of equipment from the complete *Canadian Line*. Backed by our 86 years experience in planning and equipping laundries, he can help solve your production problems. Ask for his specialized assistance anytime . . . no obligation.

Ideal INTERCHANGEABLE SYRINGES

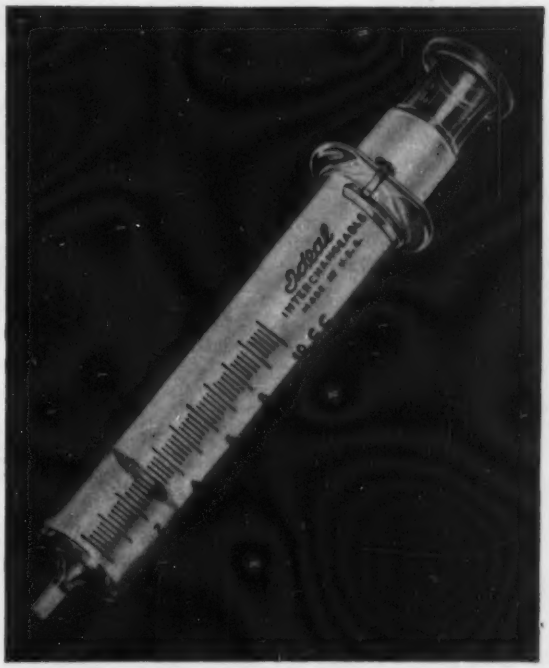
The great improvements and many advantages of a syringe with perfected interchangeable barrel and plunger are obvious. If either barrel or plunger becomes broken it is now possible to order only the broken part, with complete confidence that a perfect fit will result between the old part and its new companion piece.

Combining our newly patented Embedded Indelible Graduations* with a perfected system of interchangeable parts we have produced a syringe which is as perfect as a syringe can be.

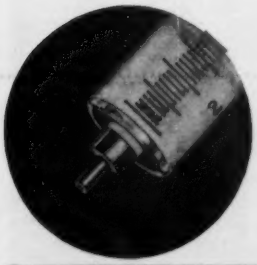
Barrel and plunger are of Kimble Resistant glass famous for its ability to withstand deterioration under repeated sterilization and also to resist sudden thermal changes. Scientific annealing eliminates any breakage due to internal strains.

Any Ideal Interchangeable Plunger plus any Ideal Interchangeable Barrel of same size equals a complete Ideal Interchangeable Syringe with *perfect fit.*

* Protected by U. S. Patent No. 2505411 April 25, 1950

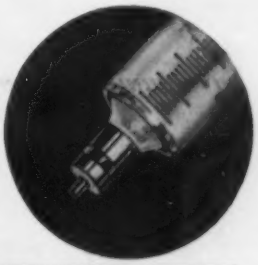


No longer is it necessary to painstakingly match serial numbers on plungers and barrels. With perfected interchangeable parts any plunger and any barrel of identical size can quickly and easily be assembled with assurance of perfect fit.



Minimum breakage and safety of operation are the salient characteristics of this Ideal *Interchangeable* Syringe, equipped with Luer-gauged Metal Tip.

The Ideal *Interchangeable* Syringe with *permanently* attached, positive-locking tip is especially advantageous in spinal and tonsil work.



ORDER IDEAL SYRINGES for IMMEDIATE DELIVERY from Your SURGICAL DEALER

HOSPITAL ADMINISTRATORS

Dixie Cups

protect patients from hidden bacteria

Cracked plates and cups can be carriers of deadly germs. Dixie Cups cannot crack or break . . . are used only *once* . . . assuring patients of a completely sanitary container.

To use Dixie Cups at meal times and throughout the day means greater hospital efficiency in terms of lighter trays, lower labour costs and faster, quieter, service.

Dixie Cups are constructed of top quality paper and are available in a wide variety of sizes.

Remember: you use Dixie Cups ONCE only, thereby eliminating any chance of disease germs being carried from one patient to another.

DIXIE CUP OFFERS A QUALITY PAPER CONTAINER FOR EVERY NEED!

DIXIE FOOD DISHES
for ice cream, salads, puddings and fruit.

DIXIE COLD DRINK CUPS
for water, fruit and vegetable juices, milk and soft drinks.

DIXIE RESTAURANT CUPS
for cream, sugar, mustard, condiments.

DIXIE HOT DRINK CUPS
for coffee, tea, cocoa.

DIXIE FOOD CONTAINERS
for soups, stews and main dishes. Tight fitting lids keep foods hot.

DIXIE CUP COMPANY (Canada) LTD.

"Dixie" is a registered trade mark of the Dixie Cup Company

BRAMPTON, ONTARIO

TABLES

Explanation

Data on the number and size of institutions, on the number of beds set up for use, and on the type of care provided by such beds, are provided in the following tables. There are two tables for Canada as a whole, which include military institutions, and two tables for each of the 10 provinces and the territories, in which military institutions are excluded.

The arrangement of horizontal headings is the same in both tables, the main classifications being Public General, Public Special, Private, and Federal. These are sub-divided by the type of ownership. In the first three the divisions are Lay (non-religious, non-governmental, Religious, Municipal, and Provincial. The federal hospitals are divided into those operated by the department of Veterans' Affairs, the Indian Health Services Branch, and the Quarantine, Immigration Medical and Sick Mariners Services Division of the Department of National Health and Welfare, Crown corporations and, in the case of the tables for Canada as a whole, the Department of National Defence.

Table 1 indicates the total number of institutions, total number of beds set up for use, and the distribution of beds according to the type of care provided.

Table 2 indicates the number of institutions and the number of beds set up for use according to the type of ownership, and the distribution of institutions by 8 size groups.

In the tables, "general" beds include beds in maternity hospitals (shown elsewhere as "Mat"), and beds in hospitals for children only (shown elsewhere as "Paed"). The column "Mental" in the tables includes psychiatric beds (shown elsewhere as "Psych"), beds for epileptics (shown elsewhere as "Epil"), and beds for other mental and nervous conditions.

With the exception of the military institutions (only certain ones of which are individually listed), the figures in the tables are compiled from those given with the other data on individual institutions listed in the directory.

The number of beds set up for use (as opposed to rated capacity) is used throughout. As indicated in the preface to the directory, this data has been supplied mainly by the institutions themselves, supplemented and checked through a variety of other sources.

Data on the number of institutions and beds of different types in Canada have been added to the information contained in the directory because of the demand for information of this nature which has not heretofore been available in this form from other sources.

Avertissement

Les données ayant rapport au nombre et à la grandeur des institutions, le nombre de lits dressés, et le type de soins auxquels ces lits sont destinés, sont fournies dans les tables suivantes. Il y a deux tables pour tout le Canada, y compris les institutions militaires et deux tables pour chacune des dix provinces et territoires à l'exclusion des institutions militaires.

La disposition de titres horizontaux est la même dans les deux tables. Les classifications générales étant public-général, public spécial, privé, et fédéral. Les sous-titres indiquent le genre de propriété. Dans le cas des institutions publiques et privées, ces divisions sont laïc (non-religieux, non-governemental), religieux, municipal et provincial. Les hôpitaux fédéraux sont divisés suivant les ministères dont ils relèvent.

Les tables pour chaque province excluent les chiffres pour les institutions dirigées par les différents services militaires du Ministère de la Défence Nationale. Ces chiffres sont ajoutés seulement aux tables pour tout le Canada.

La table 1 indique le nombre total d'institutions, le nombre total de lits dressés, et la répartition des lits d'après les soins fournis.

La table 2 indique le nombre d'institutions et le nombre de lits dressés d'après le genre de propriété, et la répartition des institutions qui ses rangent par importance en huit groupes, déterminés par le nombre de lits.

Dans les tables le titre "lits généraux" comprend les lits dans les hôpitaux de maternité (représentés ailleurs par "mat") et lits dans les hôpitaux réservés aux enfants (représentés ailleurs par "paed"). La colonne "mental" dans les tables inclue lits psychiatriques (représentés ailleurs par "psych"), lits pour épileptiques (représentés ailleurs par "épil"), et autres lits pour cas mental et nerveux.

A l'exclusion des institutions militaires (quelques-unes seulement figurent), les chiffres des tables sont tirés de ceux qui sont fournis avec les données des institutions individuelles figurant dans l'annuaire.

Le nombre de lits dressés (par opposition à capacité normale en lits) sert dans tous les cas. Comme on l'indique dans le préface de l'annuaire, ces données sont fournis en grande partie par les institutions elles-mêmes augmentées et vérifiées par une foule d'autres sources.

L'addition des tables des nombres des institutions et lits de différents genres au Canada est ajoutée aux renseignements contenus dans l'annuaire pour répondre à la demande de renseignements de cette nature que nous nous n'avons pu obtenir jusqu'à d'autres sources.

AIRKEM KILLS ODORS!

Here's how this low-cost public relations aid can help you

Your Visitors will welcome the dramatic change! "Hospital Odor"—the sanitation-medication odor laymen associate with sickness—is fully counteracted by AIRKEM's exclusive formula. 'Round the clock, the atmosphere in reception rooms, offices, halls, cafeterias, etc. remains as pleasant to breathe as fresh country air!

Your Patients will be protected from the disturbing influence of sick-room odors. AIRKEM *destroys* these odors, is *not* a highly scented perfume. And AIRKEM can be used with confidence. It is non-toxic, contains no formaldehyde.

Your Staff will appreciate the way AIRKEM takes the "odor hazard" out of everyday routine. Like hospital administrators across the country, you'll find AIRKEM removes a major source of job dissatisfaction, raises staff morale, increases efficiency.

KILLS AIR-BORNE ODORS

Use Wick Bottle — Mist Aerosol and portable mechanical equipment to kill air-borne odors.

WIPES OUT SURFACE ODORS

Use new AIRKEM 10-39 Contact Deodorant to kill offensive surface odors.

ODOR COUNTERACTANTS FOR PROFESSIONAL USE

airkem

Free Odor Control Plan.
Airkem Canada.
2715 Reading Street, Montreal, Que.
Please send us literature on AIRKEM 10-39, Mist, Wick Bottles and Mechanical Equipment. Without obligation, of course.

Painting the Lily?
You might feel with some justification that there was neither the need nor the room for further improvement in the quality and performance of ILFORD X-ray films — that any attempt to add anything further would merely be painting the lily.
Whether this is so or not, we keep trying, and whenever it is possible to add something extra without prejudice to established radiographic techniques, we do so.

Hospitals and Nursing Institutions

Hôpitaux et autres institutions semblables

Arrangement—Disposition des renseignements

There are 11 divisions of the list of hospitals and nursing institutions on the following pages. These are arranged geographically by provinces from west to east, followed by the institutions in the Yukon and Northwest Territories.

The arrangement within each division is alphabetical by city, town or post office. Where two or more institutions are located in the same town or city, the arrangement is alphabetical by hospital names.

Institutions located in suburban localities are listed under the main metropolitan area to which they are adjacent.

Il y a onze divisions de la liste des hôpitaux et autres institutions semblables sur les pages suivantes. Celles-ci sont disposées géographiquement par provinces de l'ouest à l'est, suivies des institutions dans le Yukon et les Territoires du Nord-ouest.

La disposition à l'intérieur de chaque division est alphabétique par cité, ville ou bureau de poste. Dans le cas où deux institutions ou plus sont situées dans la même ville ou cité, la disposition est alphabétique par noms d'hôpitaux.

Les institutions situées dans des zones suburbaines sont inscrites suivant le nom du centre métropolitain avoisinant.

Information—Renseignements

The information on each institution, or so much of it as is available, is reported in the following sequence: the name (in bold face type); the street or postal address; the ownership, type of operation or license, and year of establishment (in parenthesis); the number and types of beds and bassinets set up for use; statistics on admissions, births and approximate operating budget; the number of personnel employed including undergraduates; and the names and titles of administrative and chief departmental personnel.

The data on admissions, births, budget and personnel are not intended for accounting or statistical purposes but only as general information to indicate the activity of individual institutions. In many cases therefore these figures are approximations based on the latest data available, usually for the institution's last fiscal year ending prior to the date of publication.

Les renseignements relatifs à chaque institution, ou la part de renseignements disponibles, sont rapportés dans l'ordre suivant: nom (en caractères gras); rue ou adresse postale; propriétaire de l'institution, statut, et année de fondation (entre parenthèses); le nombre et genre de lits et de berceaux dressés; statistiques ayant rapport aux admissions, aux naissances et au budget approximatif de gestion; nombre du personnel employé y compris les non-diplômés; noms et titres du personnel administratif et du personnel dirigeant des départements.

Les informations ayant rapport aux admissions, naissances, budget et personnel ne sont pas destinées à des fins de comptabilité ou de statistiques mais constituent des renseignements généraux indiquant des activités de chaque institution. Par conséquent, dans bien des cas ces chiffres, fondés sur les dernières informations disponibles, sont approximatifs et se rapportent, pour chaque institution, à la dernière année fiscale se terminant avant la date de publication.

Abbreviations—Abbréviations

In most instances the meaning of abbreviations used will be apparent without reference to a key. However, the principle abbreviations used for both English and French words are indicated on the following page. Both the English and French words are indicated where the same abbreviation is used for each. Where abbreviations are used for words in only one language, the equivalent word in the other language is indicated in parenthesis.

Dans la plupart des cas la signification des abbréviations employées est claire sans qu'il y ait besoin de se référer à une clef. Cependant, les abbréviations principales indiquant à la fois des mots anglais ou français figurent à la page suivante. Dans les cas où la même abbréviation sert à désigner, à la fois un mot anglais et français, ces derniers sont indiqués. Dans le cas où les abbréviations se réfèrent à des mots dans une langue seulement, le mot correspond de l'autre langue est indiqué entre parenthèses.

Abbreviations . . .

Type of Service and Number of Beds—Genre de service et nombre de lits

The number of beds set up for use is indicated in the list following the abbreviated description of the type of medical service for which such beds are utilized.

Le nombre des lits dressés est indiqué sur la liste qui fait suite à la description abrégée du genre de service médical auquel ces lits sont destinés.

General—Beds utilized for the treatment of a wide range of conditions (excluding bassinets for infants born in hospital).	**Gen**	**Gén**	Général—Lits employés pour le traitement d'une grande variété d'affections (excluant les berceaux pour nouveaux-nés à l'hôpital).
Paediatric—Beds in general hospitals which admit children only.	**Paed**	**Péd**	Pédiatrie—Lits dans les hôpitaux généraux qui n'admettent que les enfants.
Maternity—Beds in institutions providing obstetrical service only.	**Mat**		Maternité—Lits dans les institutions qui ne fournissent que le service obstétrique.
Bassinets—Bassinets for newborn infants, born in the hospital.	**Bas**	**Berc**	Berceaux—Berceaux pour nouveaux-nés, nés à l'hôpital.
Beds in special hospitals for the treatment of particular conditions, and similar beds in special units or annexes of general or other hospitals, are designated by the following types of services:			Les lits dans les hôpitaux spéciaux pour le traitement d'affections particulières, et les lits semblables dans des formations spéciales ou annexes d'un hôpital général ou de tout autre hôpital sont désignés par les genres de services suivants:
Alcoholic	**Alcoh**		Alcoolique
Chronic	**Chron**		Chronique
Contagious	**Cont**		Contagieux
Convalescent	**Conv**		Convalescent
Domiciliary	**Dom**		Domiciliaire
Epileptic	**Epil**		Epileptique
Mental	**Ment**		Mental
Orphelinat	**Orp**		Orphelinat
Orthopaedic	**Orth**		Orthopédique
Tuberculosis	**TB**		Tuberculose
Infirm—Beds utilized for patients requiring less intensive medical care, in infirmaries, nursing homes, homes for the aged, et cetera.	**Inf**		Infirme—Lits employés pour des patients nécessitant des soins médicaux moins intenses, dans les infirmeries, les maisons de convalescence ou de repos, les maisons pour les vieillards, et cetera.
Total—Where more than one type of service is shown for an institution the total number of beds for adults and children (excluding newborn infants) is indicated.	**Tot**		Total—Lorsque plus d'un genre de service est indiqué pour une institution le nombre total de lits pour adultes et enfants (excluant les nouveaux-nés) est indiqué.

Positions and Titles—Postes et titres officiels

Acct — Accountant (Comptable)
Achtr — Acheteur (Purchasing Agent)

Trés — Trésorier (Treasurer)

Ownership—Propriété

Unless the name of the owner of the hospital is given in full, the type of ownership is designated by the following abbreviations:

A moins que le nom du propriétaire de l'hôpital soit indiqué en toutes lettres, le type de propriété est désigné par les abbréviations suivantes:

Community	**C**	Communale
Church of England	**CE**	Eglise Anglicane
Federal Government	**FG**	Gouvernement fédéral
Department of National Health and Welfare	**—NHW**	Ministère de la santé nationale et du bien-être social
Department of Veterans Affairs	**—DVA**	Ministère des anciens combattants
Department of National Defence, Navy	**—Navy**	Ministère de la défence nationale, Marine
Department of National Defence, Army	**—Army**	Ministère de la défence nationale, Armée
Department of National Defence, Air Force	**—RCAF**	Ministère de la défence nationale, Aviation
Voluntary lay corporation	**L**	Société bénévole laïque
Municipal	**M**	Municipale
Provincial Government	**PG**	Gouvernement provincial
Roman Catholic	**RC**	Catholique
Salvation Army	**SA**	Armée du Salut
United Church of Canada	**UC**	Eglise Unie du Canada

Operation or License—Statut

The following definitions were adopted by the 1951 Dominion-Provincial Conference on Hospital Statistics.

Les définitions suivantes ont été adoptées par la Conférence Fédérale—Provinciale des Statistiques Hospitalières de 1951.

Public Hospital—is one which is not operated for profit, accepts all patients regardless of their ability to pay, and is recognized as a public hospital by the province in which it is located. This includes public nursing homes, public outpost hospitals and public Red Cross hospitals. **Pub**

Hôpital public—Hôpital dont l'exploitation n'est pas à but lucratif, qui accepte tous les malades quels que soient leurs moyens et qui est reconnu comme hôpital public par la province où il est situé. (Y compris les maisons publiques de convalescence ou de repos, les hôpitaux publics des régions reculées et les hôpitaux publics de la Croix-rouge.)

Private Hospital—is one which ordinarily restricts its admissions to patients paying for the care provided, at rates determined by the management. This includes private nursing homes. **Priv**

Where the institution is owned by an individual or partnership the term "private" is deemed to designate both the type of operation or license and the ownership.

Hôpital privé—N'admet ordinairement que les malades qui payent les soins reçus aux taux fixés par la direction. (Y compris les maisons de convalescence et de repos privées.)

Lorsque l'institution est la propriété d'un individu ou de plusieurs individus associés, on acceptera le terme "privé" comme servant à indiquer à la fois le statut et la propriété.

Statistics—Statistiques

Admissions—A hospital in-patient admission is defined as the formal acceptance and reception of a person as an in-patient. Reception involves the allocation of a regular hospital bed, cot, or bassinet. **Adm**

Admissions—L'admission d'un malade hospitalisé consiste à admettre et à recevoir une personne de façon régulière, comme malade hospitalisé. La réception suppose qu'un lit ou un berceau ordinaire de l'hôpital sera attribué au malade.

Births—A newborn is defined as an infant newly born in the hospital who receives newborn care only. **Bir**

Nais Naissances—Le nouveau-né est l'enfant nouvellement né à l'hôpital et qui ne reçoit que les soins propres aux nouveau-nés.

Budget—Approximate annual cost of operating the institution, based on the latest figures available. **Budg**

Budget—Coût annuel approximatif de gestion de l'institution basé sur les chiffres disponibles les plus récents.

Personnel—Number of paid personnel, members of religious orders working as staff members, and undergraduate nurses, doctors, et cetera. **Pers**

Personnel—Nombre du personnel salarié, religieuses travaillant comme membres du personnel, et infirmières élèves, médecins internes, et cetera.

GOMCO®

PERFORMANCE—PROVED HOSPITAL EQUIPMENT

Explosion-Proof CABINET SUCTION-ETHER AND SUCTION UNITS

GOMCO No. 927 SUCTION-ETHER UNIT

For surgeries where the finest possible facilities for suction and anesthesia are desired, the choice is the beautiful No. 927, shown here. Its precision Gomco double pump provides the large reserve of capacity so desirable in busy hospitals. Suction and ether pressure are easily regulated to an exact degree. Gleaming chrome-plated brass fittings and all-steel baked enamel cabinet make for easy cleaning and long life. Large, noiseless rubber-tired casters and projecting rubber bumper. A unit quality-built through and through for a lifetime of absolute dependability and time-saving convenience.

GOMCO No. 928 SUCTION-ETHER UNIT

This unit has the same superb features as the 927 described above, with the exception of single pump construction. Near-silent performance, freedom from troubles, attractive appearance and ease of operation make these units among the most appreciated in hospitals throughout the world.

AEROVENT OVERFLOW PROTECTION,

an exclusive Gomco-developed valve, automatically prevents overfilling a suction bottle and damaging a pump of any unit described on this page.

All units on this page listed by Underwriters' Laboratories, Inc. and Canadian Standards Association for use in hazardous locations, Class 1, Group C.

GOMCO No. 929 SUCTION UNIT

Here is maximum-capacity, precision-regulated suction for the heaviest year-in, year-out demands in surgery and treatment room ! The 929 double-pump Suction Unit, you will note, has the same exterior beauty and convenience features as the 927 illustrated above. It also gives you the same sure overflow protection and explosion safety.

GOMCO No. 930 SUCTION UNIT

The 930 is another extremely valuable unit for any part of the hospital where suction treatment is required. Its single pump is typical of Gomco quality workmanship—assuring you permanently satisfying service. Its handsome cabinet and long-life fixtures are identical to those of the popular 929, illustrated.

All prices on request. Ask your dealer, or write:

GOMCO®

PERFORMANCE—PROVED HOSPITAL EQUIPMENT

A NEW GOMCO UNIT TO AID THE CHEST SURGEON

GOMCO No. 766 THERMOTIC THORACIC PUMP

A valuable new aid to post-operative treatment in cases of chest surgery, the No. 766 was designed to meet rigid requirements of chest surgeons. This silent and attention-free pump provides constant, very gentle suction for the chest cavity, which not only aids in the immediate re-compression of the lung components, but insures inflation as long as may be necessary. Suction is regulated between the safe limits of 0 to 25 cm. of water, to avoid hemorrhage; yet *volume* of suction is high enough to handle most cases of leakage.

The 766 operates on the same principle as the long-accepted Gomco Thermotic Drainage Pumps (see page 3), except for a timing device to smooth out the suction for this specialized application. Here is a unit you can use with complete confidence !

No. 766
THERMOTIC
THORACIC PUMP
(Approx. 34" High)

For The Cystoscopic Room —

GOMCO No. 855 IMPROVED TIDAL IRRIGATOR AND CYSTOMETER

Designed for the urologist and neurosurgeon, the 855 performs a completely automatic and safe cycle of irrigation and drainage. The Doctor simply sets the Tidal Irrigator at the patient's symphysis pubis level, determines the bladder emptying pressure and sets the rate of flow of the irrigating liquid. The nurse has only to fill the reservoir and empty the receptacle. The Tidal Irrigator does the rest, by noiseless, positive gravity and siphon action. A complete, compact unit that is easy to set up, easy to operate and easy to clean.

No. 855
TIDAL
IRRIGATOR
(Approx. 72" High)

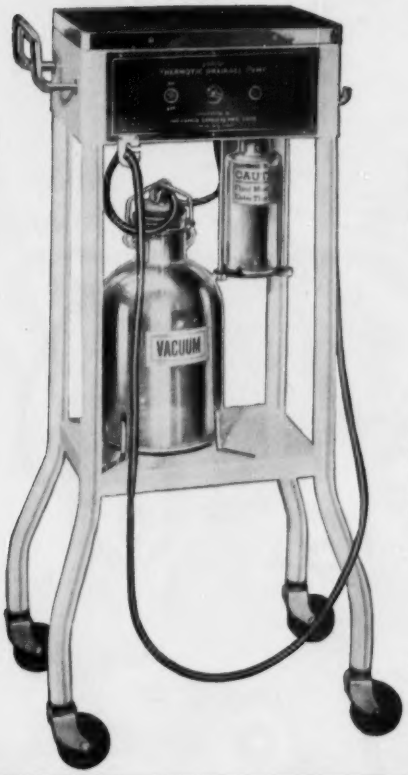
GOMCO®

PERFORMANCE—PROVED HOSPITAL EQUIPMENT

GOMCO EQUIPMENT

FOR MILD, AUTOMATIC POST-OPERATIVE SUCTION



GOMCO

THERMOTIC DRAINAGE PUMPS

Intermittent, Continuous Suction For:

- duodenal drainage
- gastric lavage
- fistula drainage
- abdominal decompression
- drainage following prostatectomy
- all continuous, mild drainage

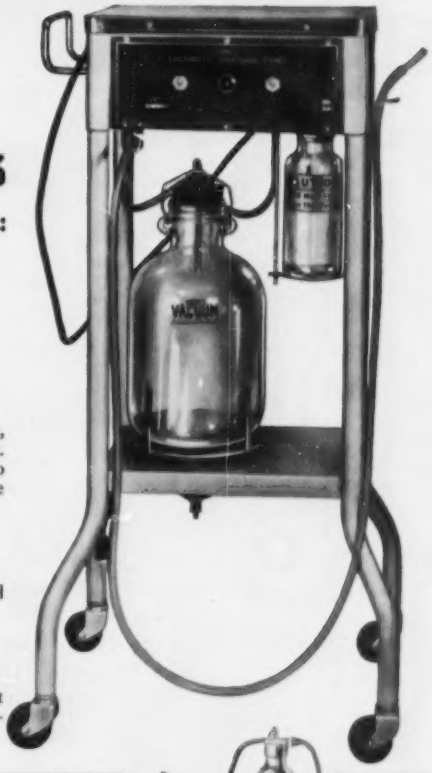
Suction is preset at 90 or 120 mm. of mercury, and will continue at that degree indefinitely. Pump is noiseless, non-mechanical and needs no attention. The gentle suction is ideal where delicate tissues must be protected.

No. 765 THERMOTIC DRAINAGE PUMP, (Shown on Left)

with all tubing, gallon suction bottle and overflow trap bottle as shown.

No. 765-A THERMOTIC DRAINAGE PUMP, (Shown on Right)

with all features of the 765 plus Aerovent Overflow Valve providing automatic overflow protection.



STRONG, CONTROLLED SUCTION

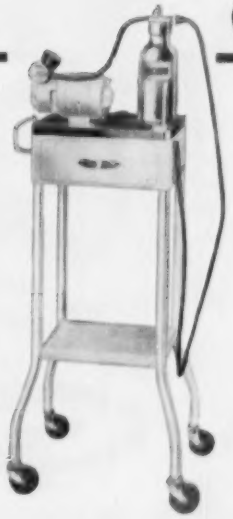
For Polio, Urological, Throat Cases, Dental Aspiration

GOMCO No. 789 Portable ELECTRIC ASPIRATOR

Weighing only 18 pounds, this sturdy little aspirator gives instant, controlled suction from 0" to 20" of mercury whenever and wherever needed. Takes less than a square foot of table space.

GOMCO No. 790 Stand Mounted ASPIRATOR

Quality-built and dependable in the Gomco tradition, the 790 is extremely mobile on its non-tipping stand —ready to give 0" to 20" of suction in O.B., Polio Wards, Treatment Rooms or other needed places in your hospital. No institution should be without these time-tested units.



For prices and further details, call your Gomco dealer or write:

GOMCO SURGICAL MANUFACTURING CORP. • 832-H E. Ferry St., Buffalo 11, N. Y.

GOMCO®

PERFORMANCE—PROVED HOSPITAL EQUIPMENT

GOMCO EQUIPMENT

Explosion-Proof SUCTION and SUCTION-ETHER UNITS

For The Hospital, Office or Clinic

GOMCO No. 900 Stand-Mounted Suction and Ether Unit

This provides all the smoothly controlled suction and anesthesia facilities of more expensive cabinet models, and has the same powerful, whisper-quiet Gomco motor-and-pump unit. Explosion-proof and protected against suction overflow by the Gomco Safety Overflow Valve, the 900 is both safe and trouble-free for operating and treatment room use, year after year.

GOMCO No. 910 Explosion-Proof Portable Suction And Ether Unit

Here are complete anesthesia and suction facilities in a "package" taking little more than a square foot of table space! Widely used as an auxiliary floor unit in large hospitals for treatment such as spraying merthiolate and in conjunction with surgery; very popular with smaller hospitals as an all-around anesthesia and treatment unit.

GOMCO No. 901 Stand-Mounted Suction Unit

(not shown)

Equipped with the same mobile, non-tipping stand and lifetime Gomco rotary pump as the 900, shown at left, but with suction facilities only, this explosion-proof unit is equally popular with institutions where budget dictates a lower first cost. The Gomco Safety Overflow Valve prevents a flooded pump, should the gallon suction bottle become over-filled.

All units on this page listed by Underwriters' Laboratories, Inc. and Canadian Standards Association for use in hazardous locations, Class 1, Group C.

GOMCO No. 911 Explosion-Proof Portable Suction Unit

An ideally safe, compact unit for floor use wherever suction is required. Its powerful rotary pump can be counted on for instant service at any time. Operator has pinpoint control of suction, from 0" to 25" of mercury, by means of the convenient Gomco Regulator Valve and Precision Gauge. A sturdy, carefully built unit for many, many years of the heaviest duty.

Now Save linen laundry, time and money

with the new Curity underpad that can't leak through

Without a doubt this is the greatest hospital money saver in years! The savings made in linen, laundry, nurses' time, and money more than pay for these Curity underpads—the pads with *waterproof plastic bottom sheets.*

The new *Skintex* top sheet lets drainage penetrate immediately to absorbent inner layers. Wet or dry, *Skintex* feels like skin, promotes patient comfort, and is actually 39% stronger, more tear-resistant than regular paper top sheets. Soft, fluffy absorbent filler is 60% thicker and holds more drainage than any comparable underpad. For added comfort and protection, the waterproof plastic bottom sheet has "traction", won't slide from under patients.

ORDER NEW

INCONTINENT PADS

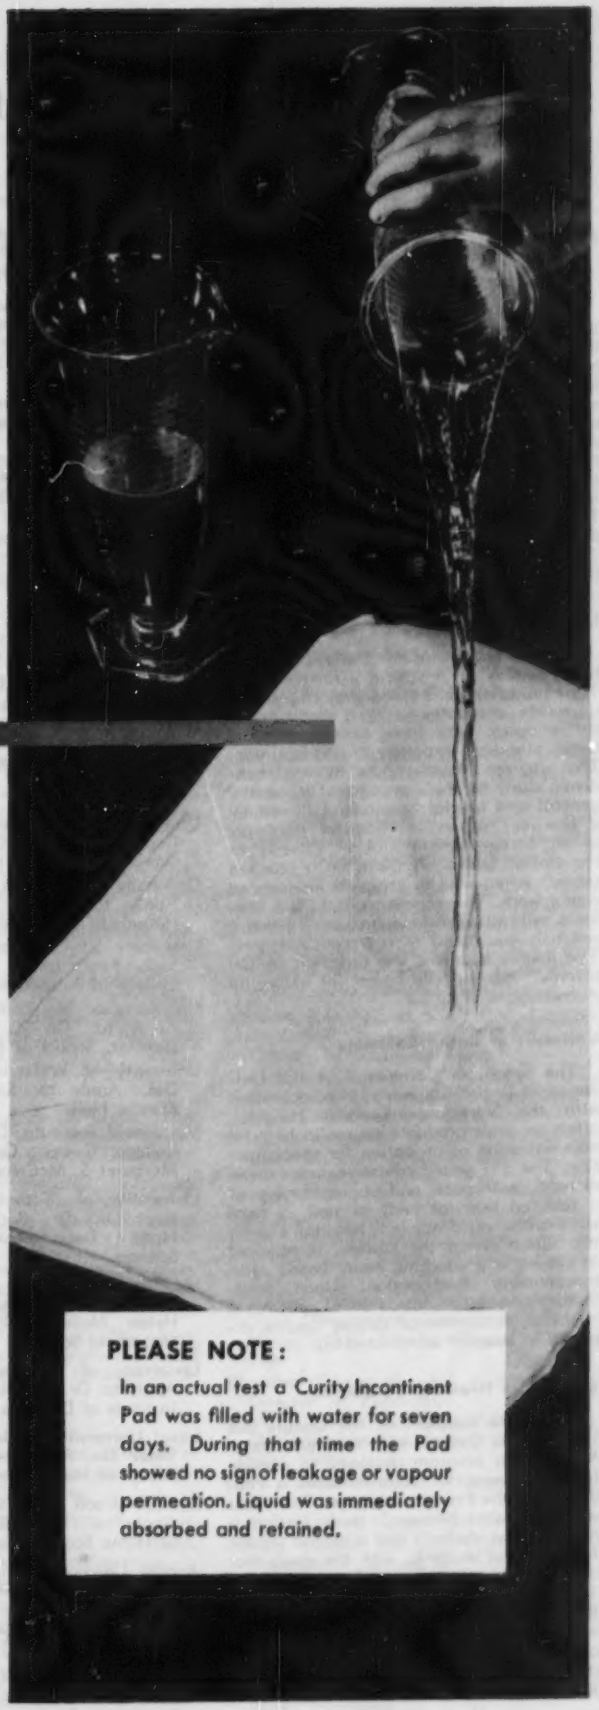
TODAY

Let them start paying for themselves in savings now!

AN EXCLUSIVE PRODUCT OF

(BAUER & BLACK)

Division of The Kendall Company (Canada) Limited



PLEASE NOTE:

In an actual test a Curity Incontinent Pad was filled with water for seven days. During that time the Pad showed no sign of leakage or vapour permeation. Liquid was immediately absorbed and retained.

Educational Programs for Hospital Personnel

Administrators

Each year, for the past ten to 15 years, short refresher courses or institutes have been held for administrators, department heads and trustees in the various provinces. In some cases, these cover general administrative problems; in others the subject matter is specific, e.g., accounting, laundry management, or medical records. Of these short study periods, the longest established course is the Western Canada Institute for Hospital Administrators and Trustees which is held annually and rotates among the four western provinces

Formal courses of training for administrators in Canada are as outlined below.

University of Toronto

The Department of Hospital Administration, School of Hygiene, University of Toronto, offers a 21 months' course for university graduates in arts, medicine or the sciences, who have acceptable academic standing, experience, and aptitude. The program includes nine months' academic study on the campus and in nearby general and special hospitals, followed by a one-year supervised hospital residency in an acceptable hospital in Canada or the United States. A thesis on a selected subject is required to complete the second year's work. The course leads to the Diploma in Hospital Administration (Toronto), which is equivalent to a Master's degree. The course is under the direction of Dr. Harvey Agnew, Professor of Hospital Administration.

University of British Columbia

The School of Commerce at the University of British Columbia, in co-operation with the Vancouver General Hospital, offers an undergraduate course in hospital administration as an option for specialization. The 6½ years' course includes seven months' instruction and apprenticeship at a selected hospital and, as well, a final ten months' residency in a hospital. During this latter period the student is required to submit a graduating essay based upon independent investigation. Upon satisfactory completion, the student receives a bachelor of commerce degree and a diploma in hospital administration.

Comité des Hôpitaux du Québec

Under the auspices of the Comité des Hôpitaux du Québec, with headquarters in Montreal, a program designed to provide formal training for administrators is conducted in the French language. Each year a concentrated two-week study session is held for new students and a second session for advanced students, with the result that many of the original class have completed 12 weeks of formal training. Throughout the year several one-week sessions, dealing with specific departments, are held and also two-week courses for directors of nursing schools. This program is a very important development in that it is really a form of undergraduate training designed to pave the way for the establishment of a post-graduate program in the French language. Director of the course is Rev. Father H. L. Bertrand, S.J., 325 St. Catherine Rd. E., Outremont, Montreal 8, P.Q.

C.H.A. Extension Course in Hospital Organization and Management

This extension course, offered by the Canadian Hospital Association, is designed to assist people already employed in the hospital field. It is of two years' duration, each year consisting of a winter session conducted on a home-study basis and a summer classroom session of four weeks at a Canadian university. Curriculum content is supervised by the faculty of the Department of Hospital Administration, University of Toronto, and leading hospital administrators have participated actively in the preparation of lesson material. Faculty for the summer sessions are authorities in the hospital and health fields. Students who complete the course successfully are awarded a certificate by the Canadian Hospital Association.

Dietitians

The academic qualification for dietitians is a degree in Household Science or Home Economics with major credit in Foods and Nutrition. Canadian universities conferring such degrees are:

University of British Columbia, Vancouver, B. C. Apply to: Charlotte S. Black, Director, School of Home Economics.

University of Alberta, Edmonton, Alta. Apply to: Mabel Patrick, Professor, Household Economics.

University of Saskatchewan, Saskatoon, Sask. Apply to: Dr. Hope Hunt, Dean, College of Household Science.

University of Manitoba, Winnipeg, Man. Apply to: Dr. A. Isabel MacArthur, Director, School of Home Economics.

University of Western Ontario, London, Ont. Apply to: Sister M. Dominica, Brescia Hall.

Macdonald Institute, Ontario Agricultural College, Guelph, Ont. Apply to: Dr. Margaret S. McCready, Principal.

University of Toronto, Toronto, Ont. Apply to: Dr. Barbara A. McLaren, Head, Department of Household Science.

Macdonald College, McGill University, Macdonald College, P.Q. Apply to: Helen Neilson, Director, School of Household Science.

University of Montreal, Montreal, P.Q. Apply to: Dr. Rachel Beaudoin, Director, Institute of Dietetics and Nutrition.

Laval University, Quebec, P.Q. Apply to: Sister Ste. Therese-de-la-Foi, Director, School of Home Economics.

Mount Allison University, Sackville, N.B. Apply to: Doris Runciman, Professor of Home Economics.

Acadia University, Wolfville, N.S. Apply to: Elizabeth MacMillan, Dean, School of Home Economics.

Mount St. Bernard College, St. Francis Xavier University, Antigonish, N.S. Apply to: Sister St. Andrew, Director of Home Economics.

Mount St. Vincent College, Halifax, N.S. Apply to: Sister Irene Marie, Director of Home Economics.

Courses, in Canadian hospitals, approved for the training of dietetic interns by the Canadian Dietetic Association are:

Royal Jubilee Hospital, Victoria, B.C. Director of Dietetics, Christine Robertson.

Vancouver General Hospital, Vancouver, B.C. Director of Dietetics, Paula R. Reber.

University of Alberta Hospital, Edmonton, Alta. Director of Dietetics, Margaret G. Lang.

Regina General Hospital, Regina, Sask., Chief Dietitian, Isobel Ross.

Hamilton General Hospital, Hamilton, Ont. Director of Dietetics, Dorothy Steel.

Hospital for Sick Children, Toronto, Ont. Supervisor of Food Service, M. Gladys Martin.

St. Michael's Hospital, Toronto, Ont. Director of Dietetics, Sister Mary Frederick.

Toronto General Hospital, Toronto, Ont. Director of Nutrition, Margaret Ketchen.

Toronto Western Hospital, Toronto, Ont. Director of Dietetics, Edith M. Wark.

Montreal General Hospital, Montreal, P.Q. Director of Dietetics, Mrs. R. Morrison.

Royal Victoria Hospital, Montreal, P.Q. Director of Dietetics, Charlotte M. Large.

Halifax Infirmary, Halifax, N.S. Director of Dietetics, Sister Frances Eleanor.

Victoria General Hospital, Halifax, N.S. Director of Dietetics, Marion I. Brown.

The course in Food Administration offered by the T. Eaton Co. Limited, Toronto, Ont., under the direction of Helen A. Buik, Supervisor of Restaurants, is also approved by the Canadian Dietetic Association for the training of dietetic interns.

Applicants for approved internship or for membership in the Canadian Dietetic Association must meet certain requirements and each is assessed on her individual accomplishment.

Laboratory Technicians

The academic requirement necessary for entrance to an approved school for the training of laboratory technologists is Senior Matriculation or the equivalent educational standing in the various provinces. On completion of at least 12 months' training in an approved hospital training centre in the following subjects, bacteriology, biochemistry, histology, parasitology, serology, and haematology, candidates may sit for examinations which are set by the Canadian Society of Laboratory Technologists. A general certificate is then awarded to those candidates who successfully complete the examinations.

Applicants for a specialist certificate must hold a General Certificate and, in addition, have had at least two years' experience in the special field; or applicants must have senior matriculation with the necessary prerequisites as outlined above and, in addition, have had at least five years' experience in the special field; or applicants must hold degrees in biological sciences (accredited university) and, in addition, have had at least two years' experience in the special field (exclusive of undergraduate studies).

The Canadian Society of Laboratory Technologists* maintains a registry for technicians under agreement with the Canadian Medical Association. The Committee on Approval of Schools for Laboratory Technologists of the C.M.A. has approved the following hospital laboratories for the training of technologists, either in general or special courses, or in both. Details of individual courses of instruction may be obtained from the laboratory director of the school.

British Columbia

Victoria Veterans' Hospital, Victoria, B.C. Director of Laboratory, George Shanks, M.D. Course, General Certificate.

St. Joseph's Hospital, Victoria, B.C. Director of Laboratory, D. B. Roxburgh, M.D. Course, General Certificate.

Royal Jubilee Hospital, Victoria, B.C. Director of Laboratory, Ross McNeely, M.D. Course, General Certificate.

Shaughnessy Hospital, Vancouver, B.C. Director of Laboratory, J. C. Colbeck, M.D. Course, General Certificate.

St. Paul's Hospital, Vancouver, B.C. Director of Laboratory, H. H. Pitts, M.D. Course, General Certificate.

Vancouver General Hospital, Vancouver, B.C. Director of Laboratory, H. K. Fidler, M.D. Course, General Certificate.

Royal Columbian Hospital, New Westminster, B.C. Director of Laboratory, Ian D. Maxwell, M.B., Ch.B. Course, General Certificate.

Provincial Mental Hospital, Essondale, B.C. Director of Laboratory, G. A. Nicholson, M. D. Course, General Certificate.

---

*The C.S.L.T. also maintains a placement bureau in order to assist both technicians seeking employment and hospitals seeking technicians for their laboratories. The Society's head office is situated at 294 Barton Street East, Hamilton, Ont.

Alberta

University of Alberta Hospital, Edmonton, Alta. Director of Laboratory, R. Edward Bell, M.D. Course: (1) General Certificate; (2) Specialties — haematology, biochemistry, endocrinology and metabolism.

Royal Alexandra Hospital, Edmonton, Alta. Director of Laboratory (acting), P. W. Davey, M.D. Course, General Certificate.

Edmonton General Hospital, Edmonton, Alta. Director of Laboratory, Samuel Hanson, M.D. Course, General Certificate.

Holy Cross Hospital, Calgary, Alta. Director of Laboratory, J. D. Duffin, M.D. Course, General Certificate.

Colonel Belcher Hospital, Calgary, Alta. Director of Laboratory, J. D. Duffin, M.D. Course, General Certificate.

Saskatchewan

Saskatoon City Hospital, Saskatoon, Sask. Director of Laboratory, J. W. Adams, M.D. Course, General Certificate.

St. Paul's Hospital, Saskatoon, Sask. Director of Laboratory, D. F. Moore, M.D. Course, General Certificate.

Moose Jaw General Hospital — Providence Hospital, Moose Jaw, Sask. Director of Laboratory, Maurice Ernest, M.R.C.S., L.R.C.P., M.B., B.S. Course, General Certificate.

Regina Grey Nuns' Hospital, Regina, Sask. Director of Laboratory, Stewart Alexander, M.D. Course: (1) General Certificate; (2) Specialties — histology, haematology, bacteriology.

Regina General Hospital, Regina, Sask. Director of Laboratory, J. D. Stephen, M.D. Course: (1) General Certificate; (2) Specialties — histology, haematology, bacteriology.

Manitoba

St. Boniface Hospital, St. Boniface, Man. Director of Laboratory, James Prendergast, M.D. Course, General Certificate.

Misericordia General Hospital, Winnipeg, Man. Director of Laboratory, O. C. Trainor, M. D. Course, General Certificate.

Deer Lodge Hospital, Winnipeg, Man. Director of Laboratory, T. H. Williams, M.D. Course, General Certificate.

Winnipeg General Hospital, Winnipeg, Man. Director of Laboratory, Daniel Nicholson, M.D. Course, General Certificate.

Ontario

Grace Hospital, Windsor, Ont. Director of Laboratory, H. S. Asselstine, M.D. Course, General Certificate.

Hotel-Dieu of St. Joseph, Windsor, Ont. Director of Laboratory, D. M. Mills, M.D. Course, General Certificate.

Stratford General Hospital, Stratford, Ont. Director of Laboratory, J. L. Penistan, M.D. Course, General Certificate.

St. Catharines General Hospital, St. Catharines, Ont. Director of Laboratory, Lorne Whitaker, M.D. Course, General Certificate.

St. Joseph's Hospital, Hamilton, Ont. Director of Laboratory, E. N. Ballantyne, M.D. Course, General Certificate.

Mountain Sanatorium, Hamilton, Ont. Director of Laboratory, A. R. Armstrong, M.D. Course: (1) General Certificate; (2) Specialty—bacteriology.

Hamilton General Hospital, Hamilton, Ont. Director of Laboratory, William J. Deadman, M.B. Course, General Certificate.

Oshawa General Hospital, Oshawa, Ont. Director of Laboratory, H. G. Pritzker, M.D. Course, General Certificate.

Wellesley Division of Toronto General Hospital, Toronto, Ont. Director of Laboratory, Thomas C. Brown, M.D. Course, General Certificate.

Toronto General Hospital, Toronto, Ont. Director of Laboratory, John D. Hamilton, M.D. Course, General Certificate.

Women's College Hospital, Toronto, Ont. Director of Laboratory, Alice W. Gray, M.D. Course, General Certificate.

Toronto East General Hospital, Toronto, Ont. Director of Laboratory, S. F. Penny, M.D. Course, General Certificate.

Toronto Western Hospital, Toronto, Ont. Director of Laboratory, Chester McLean, M.D. Course, General Certificate.

St. Michael's Hospital, Toronto, Ont. Director of Laboratory, Roderick C. Ross, M.D. Course: (1) General Certificate; (2) Specialties — bacteriology, histology, biochemistry.

St. Joseph's Hospital, Toronto, Ont. Director of Laboratory, L. S. Mautner, M.D. Course, General Certificate.

Sunnybrook Hospital, Toronto, Ont. Director of Laboratory, A. J. Blanchard, M.D. Course, General Certificate.

Mount Sinai Hospital, Toronto, Ont. Director of Laboratory, H. G. Pritzker, M.D. Course, General Certificate.

Victoria Hospital, London, Ont. Director of Laboratory, E. M. Watson, M.D. Course, General Certificate.

St. Joseph's Hospital, London, Ont. Director of Laboratory, F. W. Luney, M.D. Course, General Certificate.

Kitchener-Waterloo Hospital, Kitchener, Ont. Director of Laboratory, L. C. Fischer, M.D. Course, General Certificate.

Belleville General Hospital, Belleville, Ont. Director of Laboratory, H. H. Lucke, M.D. Course, General Certificate.

Brantford General Hospital, Brantford, Ont. Director of Laboratory, W. J. Holley, M.D. Course, General Certificate.

Kingston General Hospital, Kingston, Ont. Director of Laboratory, G. F. Kipkie, M.D. Course: (1) General Certificate; (2) Specialties—biochemistry, haematology, histology.

Hotel Dieu Hospital, Kingston, Ont. Director of Laboratory, F. F. Howatt, M.D., Course, General Certificate.

Ottawa General Hospital, Ottawa, Ont. Director of Laboratory, D. Magner, M.D. Course: (1) General Certificate; (2) Specialty — haematology.

Ottawa Civic Hospital, Ottawa, Ont. Director of Laboratory, Max O. Klotz, M.D. Course: (1) General Certificate; (2) Specialties — biochemistry, haematology, histology.

Quebec

Hôpital du Sacré Coeur, Cartierville, P.Q. Director of Laboratory (acting), Roland Guy, M.D. Course, General Certificate.

Hôpital St. Jean de Dieu, Gamelin (Laval), P.Q. Director of Laboratory, P. E. Lourin, M.D. Course, General Certificate.

Hôtel-Dieu St. Vallier, Chicoutimi, P.Q. Director of Laboratory, Wilfrid Lachance, M.D. Course, General Certificate.

Hôpital Général St. Vincent de Paul, Sherbrooke, P.Q. Director of Laboratory, Jacques Olivier, M.D. Course, General Certificate.

Hôpital Général de Verdun, Verdun, P.Q. Director of Laboratory, Roger Beaulieu, M.D. Course, General Certificate.

St. Mary's Hospital, Montreal, P.Q. Director of Laboratory, William Leach, M.D. Course, General Certificate.

Children's Memorial Hospital, Montreal, P.Q. Director of Laboratory, F. W. Wiglesworth, M.D. Course, General Certificate.

Hôpital Notre Dame, Montreal, P.Q. Director of Laboratory, Albert Bertrand, M.D. Course, General Certificate.

Jewish General Hospital, Montreal, P.Q. Director of Laboratory, M. A. Simon, M.D. Course, General Certificate.

Hôpital Sainte-Justine, Montreal, P.Q. Director of Laboratory, —. Course, General Certificate.

Hôpital Saint-Luc, Montreal, P.Q. Director of Laboratory, Paul Martin, M.D. Course: (1) General Certificate; (2) Specialties—bacteriology, serology.

Hôtel Dieu de Montréal, Montreal, P.Q. Director of Laboratory, Gaston Gosselin, M.D., F.C.I.C. Course, General Certificate.

Hôpital du Saint-Sacrément, Quebec, P.Q. Director of Laboratory, J. Edouard Morin, M.D., F.R.S.(C), F.R.C.P. (Can). Course, General Certificate.

Hôpital St. François d'Assise, Quebec, P.Q. Director of Laboratory, Hector Turcotte, M.D. Course, General Certificate.

Hôtel Dieu de Québec, Quebec, P.Q. Director of Laboratory, Henri Marcoux, M.D. Course: (1) General Certificate; (2) Specialties—histology, haematology, bacteriology, pathological chemistry.

New Brunswick

Lancaster D.V.A. Hospital, Saint John, N.B. Director of Laboratory, Arnold Branch, M.D. Course, General Certificate.

Saint John General Hospital, Saint John, N.B. Director of Laboratory, R. A. H. Mackeen, M.D. Course, General Certificate.

Nova Scotia

St. Martha's Hospital, Antigonish, N.S. Director of Laboratory, O. C. MacIntosh, M.D. Course, General Certificate.

Halifax Infirmary, Halifax, N.S. Director of Laboratory, —. Course, General Certificate.

Division of Laboratories, Pathological Institute, Halifax, N.S. Director of Laboratory, D. J. Mackenzie, M.D. Course: (1) General Certificate; (2) Specialties—bacteriology, haematology, pathological chemistry, and histology. (Instruction at Provincial Laboratory on work for Victoria General Hospital and a group of Halifax and Provincial Hospitals.)

Prince Edward Island

Provincial Sanatorium and Provincial Laboratories, Charlottetown, P.E.I. Director of Laboratory, J. H. Shaw, M.D. Course, General Certificate.

Medical Interns

The hospitals which are herein specified as "approved" provide their interns with clinical and other facilities, organization, and opportunities for study and experience which are outlined as essential in the "Basis of Approval for Internship of Hospitals in Canada," utilized by the Committee on Approval of Hospitals of The Canadian Medical Association. Graduates or final year students of unapproved or unrecognized medical schools are not accepted by these hospitals.

Because of the frequent desire of young graduates in both Canada and the United States to take internship in the other country, it has been arranged that this list of approved internships and that of the Council on Medical Education and Hospitals of the American Medical Association be reciprocally approved. Arrangements have been made also whereby credit for an internship in an approved Canadian hospital will be given by the National Board of Medical Examiners, many State licensing bodies, and the Specialty Boards in the United States.

It should be noted that the inclusion of a hospital on the "approved" list refers to the basic training as provided in a general internship. Its relationship to training for the practice of the specialties is that the Royal College of Physicians and Surgeons of Canada recognizes the basic training provided in "approved" hospitals as the common and fundamental background for doctors who may undertake further training leading to certification in one of the recognized specialties. The Royal College of Physician and Surgeons of Canada has elaborated standards of approval of hospitals for advanced graduate training in the specialties and a list of such approved Canadian hospitals may be obtained from the Royal College.

As there are a number of good hospitals in Canada which can provide their interns with an excellent training but which, for one reason or another, do not fully comply with the provisions of the "Basis of Approval", the Committee has placed these hospitals upon a "commended" list.

Further information with respect to the Basis of Approval may be obtained by writing to the Canadian Medical Association, 244 St. George St., Toronto 5.

Additional information concerning "approved" hospitals may be found in the list of hospitals, pages 60 to 101.

Footnotes.

1 — In the medical colleges at Dalhousie, Laval, Montreal, Manitoba and Ottawa, the final year is largely an internship year, and students are appointed by their Deans to internship by arrangement with the hospital as undergraduate interns. At McGill, Queen's, Toronto, Western Ontario and Alberta, the degree in medicine is awarded at the end of the fourth medical year and graduates are free to select their own internship. The Canadian Intern Placement Service, an activity of the Canadian Association of Medical Students and Interns, is utilized by the graduating classes of these five schools in obtaining appointments to first internship.

2 — *r* — Rotation; s — Straight.

3 — Autopsy Classification: A — 60% or higher; B — 59% to 40%; C — 39% to 25%; D — under 25%.

Nursing Personnel

Registered Nurses' Acts are in force in all provinces with the exception of Quebec and Prince Edward Island, which have licensing Acts. Reciprocity is in effect between all provinces provided that the requirements of the provincial Acts are met, i.e., academic and professional. This holds also for nurses from the United Kingdom, United States of America, and other countries. One of the great difficulties encountered in reciprocal registration appears to be that of inability to meet the professional, educational standards of the provinces, e.g., training in hospitals with too few beds, and lack of experience in obstetrical and paediatric nursing.

The term "Nurse" is now being applied to several categories of persons who care for the sick:

1. Registered Nurse. A nurse who has successfully completed a professional nursing course in an approved school of nursing and, after writing the registered nurses' examinations, is currently registered in one of the provinces.

2. Non-Registered Nurse. A nurse who has completed a professional nursing course and who is awaiting registration or the results of registered nurse examinations, or is ineligible for registration in the province in which she resides.

3. Psychiatric Nurse. One who has completed a course of two to three years in a mental hospital and is prepared to nurse psychiatric patients. (British Columbia has legislation covering licensing.)

4. Practical Nurse. (a) one who has completed a course for nursing auxiliary workers, as in British Columbia, Manitoba, or New Brunswick (see 5); or (b) one who without formal training but through aptitude or need is caring for the sick.

5. Nursing Assistant (nursing aide, nurses' aide, practical nurse). Persons who have completed a course for auxiliary nursing workers or the equivalent. These maybe either licensed or certified.

6. Ward Aide (Ward Maid). Untrained workers who carry out non-nursing and/or housekeeping duties on a hospital ward.

Auxiliary Nursing Workers

Eight of the ten provinces have some type of school for nursing auxiliaries. Although the Canadian Nurses' Association has favoured the title "nursing assistant", there is variation in the terms used. In general the registered nurses' associations have some jurisdiction over the schools, having a representative on the advisory board or its equivalent.

Licensing legislation for nursing auxiliaries is in effect in Alberta and Manitoba and has been passed in Prince Edward Island though not yet in effect there. Provinces having legislation do accept nursing auxiliaries trained elsewhere, upon production of the necessary credentials. The uniform worn by these workers is different in each province but in all cases distinctive from that of the registered professional nurse. Schools for the training of auxiliary nursing workers are:

British Columbia

Vancouver — School for Practical Nurses, Vancouver Vocational Institute, Victory Square, Vancouver.

Alberta

Calgary — School for Nursing Aides, 1315-16th Avenue, Northwest. Registrar Consultant: Miss Frances Ferguson.

Saskatchewan

Saskatoon — School for Nursing Assistants, Canadian Vocational Training School, 33rd St. Principal: E. A. Davies. Duration of course: 9 mths.

Manitoba

Portage la Prairie — Training School for Practical Nurses,* Portage School for Mentally Defective Persons.

Selkirk — Training School for Practical Nurses*, Selkirk Hospital for Mental Diseases.

St. Boniface — St. Boniface School for Practical Nurses, 171 Despins St.

Winnipeg — The Central School for Practical Nurses, Manitoba Technical Institute, Portage Ave., at Wall St.

Ontario

The Ontario Department of Public Health conducts 9-month courses for the training of certified nursing assistants at hospitals located in Toronto, Kingston, and Fort William. Two schools are operated independently at hospitals located in Picton and Brockville; but students try the examinations set by the Ontario Department of Public Health.

Quebec

Bordeaux — L'Ecole d'Aides-Malades, Hôpital Ste-Joseph des Convalescents. Director: Sr M. Emerentienne.

Montreal — Montreal School for Nursing Aides, sponsored by The Association of Nurses of the Province of Quebec and Hospital Councils, at St. Mary's Hospital. Director. Mrs. L. H. Fisher.

Verdun — Verdun Protestant Hospital (Psychiatric — 12 mths.)

New Brunswick

Moncton — School for Practical Nurses, Provincial Technical Institute, Collishaw Street.

Nova Scotia

Dartmouth — Nova Scotia Hospital (Psychiatric — 9 mths.)

Kentville — Nova Scotia Sanatorium (Tuberculosis — 9 mths.)

---

* Graduates from these institutions possess a diploma in psychiatric nursing and, in addition to their psychiatric training, have had an affiliation with a general hospital in order to qualify for licensure as practical nurses in the Province of Manitoba.

The Department of Veterans' Affairs operates schools at Sunnybrook Hospital, Toronto, Ont; Queen Mary Veterans' Hospital, Montreal, P.Q.; and at Camphill Hospital, Halifax, N.S. The courses are of 9 months' duration and students take the examinations set for certification in the respective provinces. Both male and female students accepted.

Male Nurses

The following schools of nursing accept male students for training

British Columbia

Vancouver — St. Paul's

Alberta

Calgary — Holy Cross

Edmonton — Royal Alexandra; and University of Alberta

Lamont — Archer Memorial

Ponoka — Provincial Mental Hospital

Saskatchewan

Humboldt — St. Elizabeth

Moose Jaw — Moose Jaw General; and Providence

Saskatoon — Saskatoon City; and St. Paul's

Manitoba

Winnipeg — Winnipeg General

Ontario

Chatham — St. Joseph's

Cornwall — Cornwall General

Hamilton — McMaster University; and St. Joseph's

Kitchener — Kitchener-Waterloo

Ottawa — Ottawa Civic

Peterborough — St. Joseph's

Port Arthur — General; and St. Joseph's

St. Catharines — St. Catharines General

Sudbury — Sudbury General; and St. Joseph's

Toronto — Toronto General; and University of Toronto

Whitby — Ontario Hospital

Quebec

In the province of Quebec no male nurses are registered under the present law. The following schools accept male students but graduate them as orderlies:

Chicoutimi — Hôtel Dieu

Levis — Hôtel Dieu

Mastai — Hôpital St-Michel-Archange

Montreal — Hôpital de la Merci (for religious only)

Quebec City — Hôtel Dieu

The following hospitals accept male students for psychiatric training. They are not eligible for registration.

British Columbia

Essondale — Provincial Mental Hospital

Alberta

Ponoka — Provincial Mental Hospital

Manitoba

Brandon — Hospital for Mental Diseases

Ontario

London — Ontario Hospital

Kingston — Ontario Hospital

Whitby — Ontario Hospital

Quebec

Verdun — Verdun Protestant (English)

Pharmacists

For entrance to any of the Canadian Schools of Pharmacy a student must have obtained senior matriculation or four years of high school standing plus first year university in arts and sciences. Two schools offer a course in hospital pharmacy or hospital pharmacy administration — College of Pharmacy, University of Saskatchewan, and the Faculty of Pharmacy, University of Toronto. The Canadian Schools of Pharmacy are as follows.

University of British Columbia, Faculty of Pharmacy, Vancouver, B.C. Director: Dean A. W. Matthews. No. of graduates yearly: 40.

University of Alberta, School of Pharmacy, Edmonton, Alta. Director: Dr. M. J. Huston. No. of graduates yearly: 30.

University of Saskatchewan, College of Pharmacy, Saskatoon, Sask. Director: Dean W. C. MacAuley. No. of graduates yearly: 35.

University of Manitoba, School of Pharmacy, Winnipeg, Man. Director: Professor D. McDougall. No. of graduates yearly: 30.

University of Toronto, Faculty of Pharmacy, 46 Gerrard St. E., Toronto. Director: Dean F. N. Hughes. No. of graduates yearly, 125.

University of Montreal, Faculty of Pharmacy, Montreal, P.Q. Director: Dean A. F. Larose. No. of graduates yearly: 70.

Laval University, School of Pharmacy, Quebec, P.Q. Director: Professor J. A. Marquis. No. of graduates yearly: 20.

Maritime College of Pharmacy, Halifax, N.S. Director: Dean J. E. Cooke. No. of graduates yearly: 20.

Physical and Occupational Therapists

Courses in physical and occupational therapy are given in two Canadian univerisities, administered in each case by the faculty of medicine. There are no longer any approved schools giving training in either physical or occupational therapy alone, in Canada. Graduates of the present combined three-year diploma courses are qualified to practise both physical and occupational therapy.

The approved schools of physical and occupational therapy, in Canada, are:

University of Toronto, Division of Physical and Occupational Therapy, 6 Devonshire Place, Toronto, Ont. Director: A. T. Jousse, M.D. Entrance requirements, Grade XIII. Student capacity per year—115.

McGill University, School of Physical and Occupational Therapy, 1266 Pine Avenue W., Montreal, P.Q. Director: Guy Fisk, M.D., C.M., D.T.M. & H. (Eng.). Entrance requirements, Grade XII and one year university in prephysical and occupational therapy, or Grade XIII. Student capacity per year—40.

The Canadian Association of Occupational Therapy has a headquarters office at 331 Bloor Street W., Toronto. A national registry of qualified occupational therapists is maintained as well as a registry of employment opportunities. A consultant service is available and any information pertinent to occupational therapy across Canada may be obtained from this source.

Foreign-trained occupational therapists are accepted through membership examinations if their course of training meets the standards set by the Canadian Association of Occupational Therapy.

The Canadian Physiotherapy Association, 10 Bedford Rd., Toronto, Ont., maintains a national registry for physiotherapists who are graduates of university courses or the equivalent in physiotherapy. Physiotherapists whose qualifications do not meet the standards set by the Canadian Physiotherapy Association are generally registered and licensed to practise by the province in which they are working.

Foreign-trained physiotherapists: Reciprocal registration agreements exist between the C.P.A. and the C.S.P. of Great Britain; the physiotherapists board of New Zealand; and graduates holding the diploma in physiotherapy from the University of Australia. All other foreign-trained physiotherapists are accepted through membership examinations, if their course of training meets the standards set by the C.P.A.

* * * *

Radiological Technicians

The minimum academic qualifications, set by the Canadian Society of Radiological Technicians and which apply to all students planning to study radiography in Canada, are Junior Matriculation or University Entrance including one year of High School Physics. The course consists of two years' training under a radiologist certified by the Royal College of Physicians and Surgeons or a diplomate of the American Board of Radiology. A list of "approved" training schools for radiological technicians, in Canada, is not available at present but information concerning courses within a province may be obtained from the Director representing that province on the C.S.R.T. Board of Directors or the Secretary of the local Member-Society (see Associations, page 135.)

Directors representing the provinces are as follows:

British Columbia — S. Mel Smith, R.T., 226 McLennan Ave., Lulu Island, Vancouver.

Alberta — John L. Welch, R.T., Col. Belcher Hospital, Calgary.

Saskatchewan — James P. Connell, R.T., Medical Arts Bldg., Regina.

Manitoba—Desmond Butler, R.T., Medical Arts Bldg., Winnipeg.

Ontario — John Collins, R.T., Plant 2, McKinnon Industries Ltd., St. Catharines.

Quebec — John Brewer, R.T., 2267 Hingston Ave., N.D.G., Montreal.

New Brunswick — Rev. Sister M. de Lellis, R.N., R.T., St. Joseph's Hospital, Saint John.

Nova Scotia — Albert Perry, R.T., Dawson Memorial Hospital, Bridgewater.

Newfoundland — Thomas Murphy, R.T., St. John's General Hospital, St. John's.

* * * *

Record Librarians

The Canadian Association of Medical Record Librarians approves six schools for medical record librarians. All of these offer 12-month courses and the entrance requirement is senior matriculation. These schools are:

Manitoba

St. Boniface Hospital, St. Boniface, Man. Director: Sister Marie St. Pierre, R.R.L. Student capacity: 3.

Winnipeg General Hospital, Winnipeg, Man. Director: M. E. McGuire, M.B. Ch.B., R.R.L. Student capacity: 4.

Ontario

St. Michael's Hospital, Toronto, Ont. Director: Sister Mary Paul, R.R.L. Student capacity: 15.

St. Joseph's Hospital, Peterborough, Ont. Director: Sister M. Celine, R.R.L. Student capacity: 4.

Hotel Dieu Hospital, Kingston, Ont. Director: Sister Keevil, R.R.L. Student capacity: 4.

Quebec

Hotel Dieu Hospital, Montreal, P.Q. Director: Sister St. John-of-the-Cenacle, R.R.L. Student capacity: 12.

Nova Scotia

Halifax Infirmary, Halifax, N.S. Director: Sister Margaret Clare, R.R.L. Student capacity: 4.

C.H.A. Extension Course for Training Medical Record Librarians

An extension course for training medical record librarians is sponsored by the Canadian Hospital Association, in cooperation with the Canadian Association of Medical Record Librarians. The course is of two years' duration, each year consisting of a winter session of four weeks in the medical record department of a Canadian hospital approved for the purpose. Students may elect to take the first year or both years of the course. Curriculum content is supervised by the Canadian Association of Medical Record Librarians, and lessons are prepared and reviewed by experienced medical record personnel. Upon satisfactory completion of the course, the student will receive a certificate from the Canadian Association of Medical Record Librarians. A preliminary certificate will be awarded by the Association at the end of the first year. Neither certificate is to be confused with the certificate (R.R.L.) now granted by the Canadian Association of Medical Record Librarians to graduates of the one-year academic course, who have passed the C.A.M.R.L. examination for registration.

Social Workers

There are 8 schools of social work in Canada and all require students to have a B.A. or equivalent degree for entrance. The schools are as follows:

University of British Columbia, School of Social Work, Vancouver. Director: Miss Marjorie J. Smith. Approx. student capacity: 124. Teaches medical social work.

University of Manitoba, School of Social Work, Winnipeg. Director: Clarence E. Smith. Approx. student capacity: 33.

University of Toronto, School of Social Work, Toronto, Ont. Director: Charles E. Hendry. Approx. student capacity: 148. Teaches medical social work.

University of Ottawa, St. Patrick's College, School of Social Work, Ottawa. Director: Rev. Swithun Bowers. Approx. student capacity: 30.

University of McGill, School of Social Work, Montreal. Director: Dr. John O. Moore. Approx. student capacity: 76. Teaches medical social work.

University of Montreal, School of Social Work, Montreal, P.Q. Director: Rev. André M. Guillemette. Approx. student capacity: 50. Accredited for Medical Social Work.

Laval University, School of Social Work, Quebec, P.Q. Director: Rev. G. Poulin. Approx. student capacity: 38.

University of King's College, Maritime School of Social Work, Halifax, N.S. Director: Lawrence T. Hancock. Approx. student capacity: 22. ●

THE CANADIAN HOSPITAL

The Canadian Hospital is published monthly by the Canadian Hospital Association as its official journal devoted to the hospital field across Canada.

The subscription rate in Canada, U.S.A., and Great Britain is $3.00 per year. The rate for each additional subscription to hospitals or organizations having a regular subscription (and personal subscriptions for individuals directly associated with them) is $1.50 per year. The rate to other countries is $3.50 per year. Single copies, when available, are supplied at 50¢ each.

For further information or subscriptions write to: The Canadian Hospital Association, 280 Bloor St. W., Toronto 5, Ontario.

For Accuracy and Speed

-AO BLOOD INSTRUMENTS

"BRIGHT LINE"

Hemacytometer

First choice of physicians—for accurate results, ease in counting. Cells are clearly visible on the dark metallized surface of the AO "Bright-Line" Counting Chamber. New, extra long plateaus are easier to fill. Made of durable "Pyrex" with a concavity under the ruled areas to prevent scratching and to prolong the useful life of the chamber.

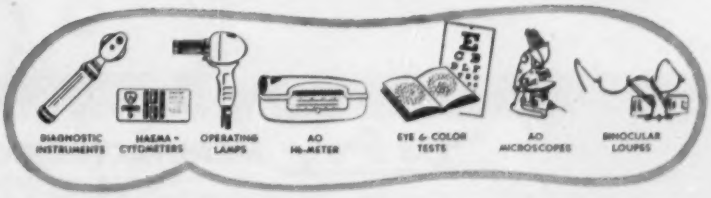
CHOICE OF POCKET-SIZE CASES

- Standard — compact, semi-flexible polyethylene case, resistant to laboratory reagents.
- Deluxe—plush lined metal base case, finished in red leatherette.

"POCKET-SIZE"

Hb-Meter

Join the thousands of doctors who use AO Hb-Meters to avoid needless delay in determining hemoglobin concentration. Determinations may be conveniently performed at the bedside in less than three minutes. A single drop of blood is placed on the glass chamber and agitated with a hemolysis applicator. Once hemolysis is complete, the chamber is inserted in the Hb--Meter, and the hemoglobin concentration read directly from the graduated scales on the instrument. No dilutions or volumetric measurements necessary . . . sources of error minimized . . . laboratory accuracy achieved consistently.

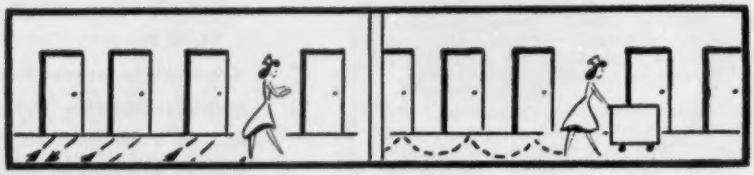


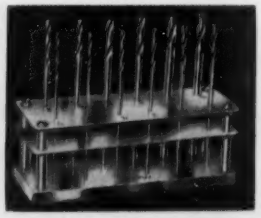
American Optical Company
Canada Limited
120 Wellington St. W., Toronto

AMERICA'S FIRST NAME IN OPTICAL INSTRUMENTS FOR MEDICINE

De Puy Economy Walker

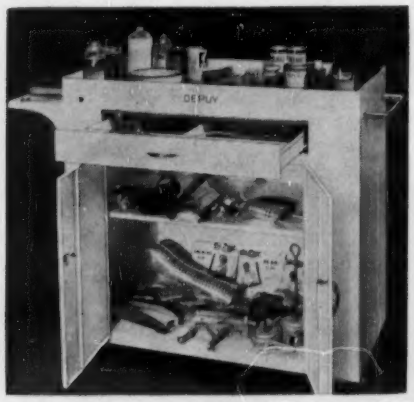
This walker enables many bedridden patients to walk. Saves nurse work taking patients to bathroom. Gives patients confidence, speeds their recovery. Weighs 4 pounds, supports 400 pounds. $12.00.

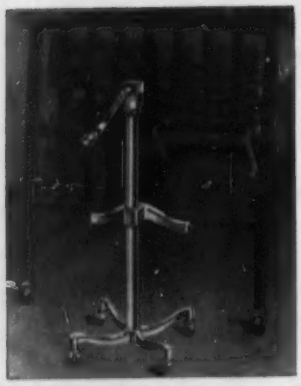




De Puy Drill Bit Rack

Holds bits always ready for operating room use or for sterilization. Each bit size is marked by hole. Heavy bottom prevents tipping. Saves handling, speeds surgical procedures. Stainless steel. $8.00.





De Puy Mechanical Bed Jack

The smallest nurse can lift the heaviest patient and bed with this Jack. Rolls on casters where needed. No danger of slipping, no messy hydraulic fluid leak.

De Puy Screw Rack

Keeps screws sterile, in order, ready to use without touching. Simply replace screws used after operation and sterilize entire unit. New compact stainless steel model.

De Puy Orthopedic Fracture Cart

Saves nurses running back and forth for supplies. Saves doctors waiting. 40" long, 20" wide. Stainless steel top is dropped 3" to keep equipment from rolling off. Swivel casters roll easily, quietly. Sturdy construction gives years of service. Only $124.

These work-savers pay for themselves in nurses' time saved. They improve service to patients. WRITE FOR FREE circulars on these 5 items today and our complete Fracture Catalog.

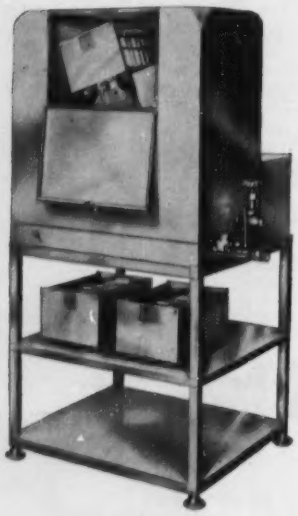
KLEEN-O-MATIC *technique*



SYRINGE and GENERAL GLASSWARE WASHER

- *Fast*
- *Simple*
- *Economical*
- *Adaptable*

Ferris-like wheel holding four removable baskets rotates syringes, or other glassware, through hot detergent solution (temperature boosted by 2 immersion heaters) for remarkable ease of washing. Important safety factor in that personnel never touches contaminated glassware until processing is completed. When the syringes have been thoroughly washed and rinsed, syringe holder is removed from baskets for simple, predetermined matching of barrels and plungers before autoclaving. Normal washload of 4 full baskets requires 30-minute cycle for one wash, two rinses. Stainless baskets each hold 64 2cc syringes; 45 5cc syringes; 30 10cc syringes. Other baskets accommodate 20, 30, 50 and 100 cc syringes . . . as well as being equally adaptable to all Central Supply's small glassware . . . and even formula bottles.

Washer in bench model, or available on steel platform, optional at extra cost.

Installation requirements: hot water, drain, and 220 volt, 4500 watt, 60 cycle, single phase electrical connections. Steam heat model available.

Send for illustrated folders

KLEEN-O-MATIC NEEDLE WASHER and RINSER

safety and savings!

Needle washer-rinser will process 700–1,000 needles an hour . . . compare this with your present needle washing requirements! Needles pre-soaked from floors in specially designed manifolds which are inserted, as is, into washer for ½ minute, then to rinser for ½ minute. Clean needles then emptied onto inspection tray before autoclaving. Drying cycle has been purposely omitted as unnecessary. Thus, the compressed air fixture and an extra bothersome step are avoided.

Hot detergent solution is forced down outside of needle shaft, then up through lumen and swirled through hub, eliminating vibration. Effects very superior cleansing with no dulling of needle points, as experienced with reverse flow cleansers.

All-important is the fact that your personnel will never come in contact with contaminated needles until processing has been completed.

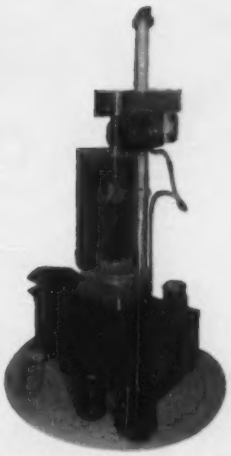
Wherever hospital glassware is washed

SOUTHERN CROSS GLASS WASHERS

Will Do The Job Better—Faster—More Economically

- Formula Room
- Laboratories
- Pharmacy
- Blood Bank
- Kitchen
- Central Supply

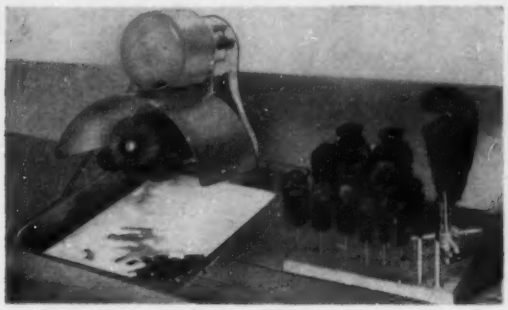


MODEL 800-A . . . For all large bottles of from 2 liters to 5 gallon capacity such as gastro evacuator, serum or solution.

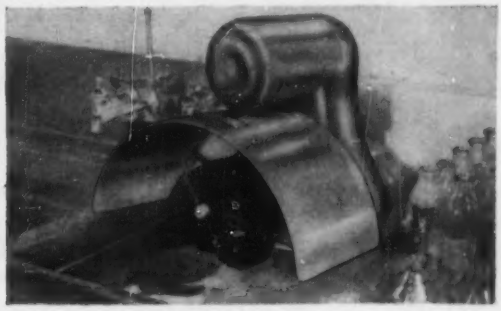
OVER 2,000 INSTALLATIONS OF SPARKLING GLASSWARE

Southern Cross Brush Washers eliminate inefficient, time-consuming soaking and hand washing methods forever; eliminate breakage. The perfect friction action of nylon bristles cleans every surface instantly and removes completely any type of glass film or heavy soil. Whatever your glass cleaning problem, there's a Southern Cross Glass Washer to solve it quickly, efficiently, economically.

A MODEL FOR EVERY PURPOSE

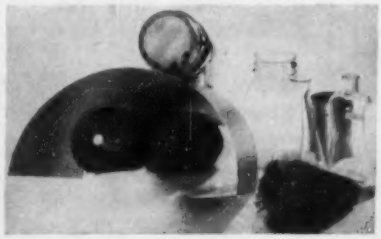


MODEL 300-B . . . The standard for laboratory glassware—from 10-mm tubes to 1-liter erlemeyer flasks. Cleans 2 pieces at once, inside and out. Portable, with complete range of interchangeable standard laboratory brushes.



MODEL 300-C . . . Used in over 1600 formula rooms for cleaning 4- and 8-oz. narrow-neck or wide-neck nursing bottles. Saves time, eliminates breakage, insures absolute cleanliness.

MODEL 300-E . . . Washes test tubes, syringes. Ideal for central supply room handling up to 900 pcs. per hour. Needs no plumbing or special fixtures.



MODEL 100-C . . . For your large glassware from 1 liter to 4 liters capacity, yet completely portable. Ensures maximum cleanliness at minimum cost.

MODEL 300-A . . . Washes drinking glasses. Over 6,000 installed in commercial kitchens. Cleans 2,000 glasses per hour, utilizing 1 operator to wash, rinse, sanitize. Portable; needs no special plumbing or fixtures.

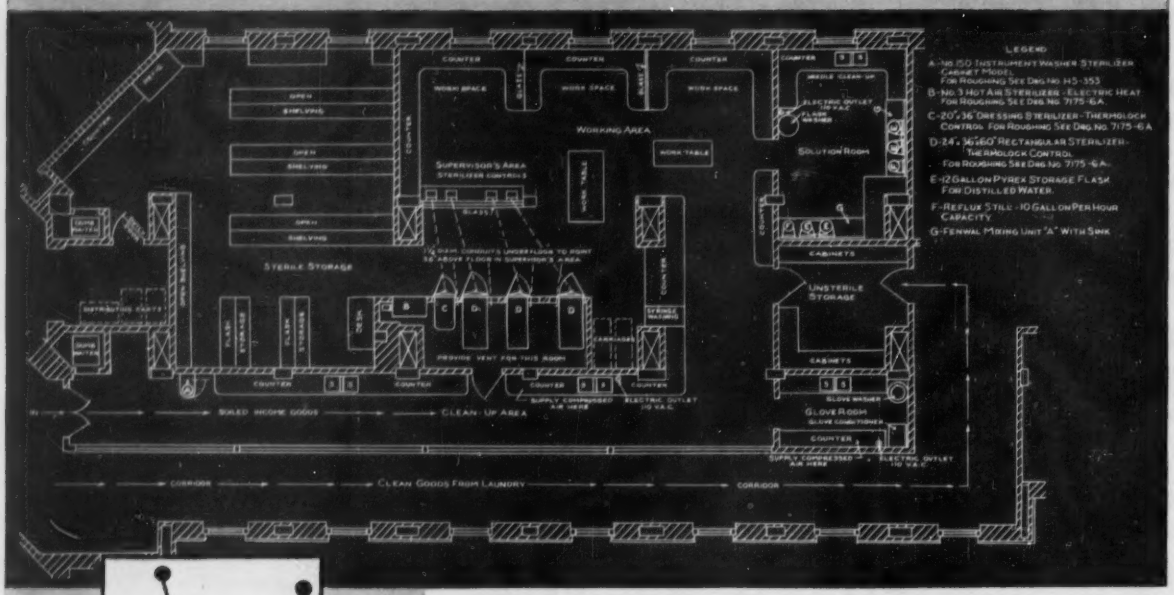
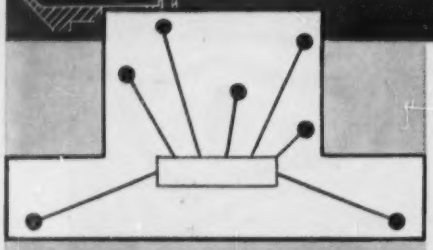
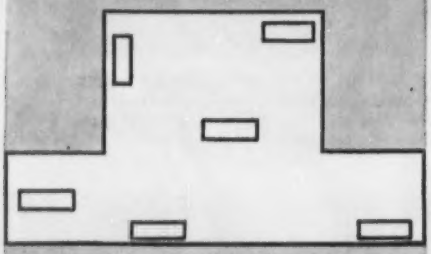
A CENTRAL STERILE SUPPLY CUTS COSTS





Typical Central Sterile Supply centralizes facility for greatest economy.



Decentralized system means increased equipment and personnel expense.

SAVES IN EQUIPMENT — PERSONNEL — TIME

A modern CENTRAL STERILE SUPPLY DEPARTMENT reflects its economies in most all phases of hospital operation. Regardless of bed capacity, the preparation, sterilization and distribution of materials in a central facility requires less personnel, less equipment, and saves time.

- **NO OVER-EQUIPPING** — Equipment limited to actual units indicated to process routine and emergency supplies.
- **STANDARDIZED PROCEDURES** may be placed under supervision of one competent authority. Greater safety control . . . less possibility of error . . . less waste.
- **NON-SKILLED WORKERS** and lay aids can assume routine manual duties and thus free highly trained nurses for floor and bedside duties.
- **ESTABLISHES FOCAL DISPENSING CENTER** — Serves to simplify requisition and inventory control . . . a constant check against waste and loss of stocked supplies.

PLAN ANALYSIS . . .
Castle's gratis service

Let our experienced Planning Department analyze your present floor plans or proposed construction blueprints. Let us offer recommendations as to the **which — where — how** and **cost** of one adequate installation . . . without charge or obligation.

Demand *Castle* 4-star performance

FINGER-TIP CONTROL — The beam of the Safelight is positioned with the speed and facility of a flashlight in the hand. In its three most popular models, there is no counter-weight, no heavy ball to cause exasperating head injuries. Its internal counterbalancing mechanism is smooth, effortless, and uses no functional devices or manual locks. (Note: No. 51 does have counterweight.)

EXPLOSION-PROOF SAFETY — Castle Safelights are truly safe from explosion because of their unique and scientific construction. They meet all Underwriters' requirements for hazardous locations. Patients and operating personnel are constantly guarded. Highly combustible gaseous mixtures cannot be ignited by any part of the Safelight or by phase of its use. This safety is mandatory in the operating room.

SUPERIOR QUALITY OF LIGHT — Doctors using the Safelight are amazed that its illumination so well compares with that of a major light. Its unique optics will illuminate the entirety of any deep cavity, yet without eye-tiring surface glare or contrast. With the Safelight, vision is better, easier and less fatiguing.

FOUR 4-STAR MODELS — The most popular Safelight model is the No. 52, floor type with pantograph arm . . . available with 4-footed or circular base. The Wall and Ceiling types, Nos. 53 and 54, also feature the "easy-as-pointing-a-flashlight" adjustability. An alternate floor model, No. 51, has a conventional ball counterweight. Floor model casters are static conductive and provide complete stability in all lamphead adjustments.

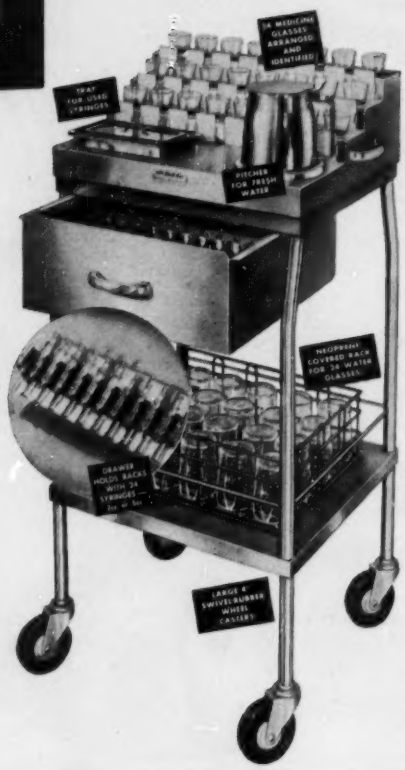
GIVE YOUR HOSPITAL THE ADVANTAGES OF THE

Medi-Kar Experience-Proved Medication System . . .



No other medication cart can save you up to 53% in medication time . . . make such easy, safe deliveries to bedside . . . save nurses so much time and work!

Let the more than 1000 hospitals using over 3800 Medi-Kars tell you why they adopted the Medi-Kar, the "Cadillac" of all medication carts, for their nursing service. These leading hospitals found from *experience*—no other medication system offers the practical advantages of safety and convenience for the patients with such great savings in time and work for their nurses!

With the Medi-Kar System one nurse can perform the duties of many — by preparing and administering the medications for a complete nursing section at once. No wasted trips back-and-forth for supplies. Up to 48 complete medications —24 oral and 24 hypos, each safely identified, plus all needed supplies roll easily and quickly to patient's bedside.

Act today—learn more about how the Medi-Kar *Experience-Proved* Medication System will benefit your hospital—send for complete details!

1 24 complete oral medications are prepared at one time. Both the medicine glasses and the patients' medicine cards are placed in permanent holders for accurate, safe identification.

2 24 loaded hypodermic syringes are placed in special racks. Each syringe protected by an acceptable safe aseptic technique and properly, safely marked by the patient's own medicine card.

3 The racks slide into the drawer for transit. Syringes are held level and firm by *both* spring clips and sponge trough. No danger of medication leakage or sponges falling off. Medication and cards remain *precisely* as placed until ready for the patient.

4 The Medi-Kar rolls to the patient's bedside and the nurse selects either oral or hypo medication without delay. Everything she needs is provided — even fresh water, glasses and a tray for soiled syringes. This procedure is repeated for as much as an entire nursing section with complete safety and efficiency.

Dietetic

Canadian Dietetic Association, President, Mrs. Ruth D. Reid, Bank of Montreal, 119 St. James St. West, Montreal, Que.; Secretary, Eleanor Sortome, Royal Victoria Hospital, Montreal, Que.; Office Secretary, Joan Brown, 415 Bloor St. West, Toronto, Ont.; annual meeting, June 8-10, Halifax, N.S.

Foundations

Banting Research Foundation, Medical Office, University of Toronto, Toronto, Ont.; Chairman, A. N. Mitchell; Hon. Secretaries, Prof. A. W. Ham, Prof. J. K. W. Ferguson.

Rockefeller Foundation, 49 West 49th St., New York 20, N.Y., U.S.A. Canadian activities include appropriations to various Canadian universities, institutions, and organizations for research in certain limited fields in the natural and social sciences, in the humanities, and in medicine and public health, and the financing of post-doctoral fellowships to individual Canadians for work in fields related to the Foundation's general program. Under the Public Health Program aid is given for teaching in public health and nursing.

R. Samuel McLaughlin Foundation, 217 Bay St., Toronto 1, Ont.; Trustees, R. S. McLaughlin, Oshawa, Ont.; J. C. Fraser, Cedar Ridge, Scarborough, Ont.; Dr. W. E. Gallie, Toronto, Ont. Incorporated in 1951 under Letters Patent, Province of Ontario, for the promotion of the health and welfare of the Canadian people by (1) improvement in the education and training of the teaching staffs of the medical schools and their associated hospitals throughout Canada, and (2) the encouragement and support of medical research in these institutions.

W. K. Kellogg Foundation, 250 Champion St., Battle Creek, Mich., U.S.A., President and General Director, Dr. Emory W. Morris; Director, Division of Hospitals, Andrew Pattullo. The purpose of the Foundation is "to receive and administer funds for the promotion of the health, education and welfare of mankind . . ." In Canada the Foundation is assisting various universities in developing graduate and post-graduate educational programs for practising physicians and dentists. It is also assisting in developing an accrediting program for dental schools and in establishing the first Canadian university course for the training of dental hygienists. Assistance is also being provided for the improvement of basic nursing education, the establishment of university courses for the training of hospital administrators, the development of on-the-job training programs for hospital administrators and allied personnel, and in-service educational opportunities for school administrators.

Victoria Hospital
London, Canada

March 8, 1954.

Dear Sir:

Unnecessary expense during the latter part of 1948 we realized that a duplicate expense of time was taken in the hospital retyping or rewriting the same information from one form to another. This information was obtained from our admittance records and many short forms that are required for each patient entering the hospital.

With the help of DITTO of Canada, Limited, the forms were designed to conform to each other, where necessary, the single typing of DITTO Reproducing off to a letter of records, including all short forms, are no longer required on the machine to eliminate "Master." A fast Stencil Maker is used on the machine to eliminate certain information that is not required on some of the forms.

The entire procedure is fast, not complicated and is accurate. There can be no errors caused by rewriting since no rewriting is necessary.

We are extremely satisfied with the DITTO Method and would not hesitate to recommend it for both large and small hospitals.

The DITTO Machine is also an extremely fast duplicator that we use for many general duplicating jobs that are to be found in any hospital.

Yours truly,

R. N. Roberts
Assistant Superintendent

"...we highly recommend the DITTO method for large and small hospitals."

MR. W. N. ROBERTS, ASSISTANT SUPERINTENDENT, VICTORIA HOSPITAL, LONDON.

As stated in this letter of March 8, 1954, Mr. W. N. Roberts reports that the DITTO Method installed in 1948 at the Victoria Hospital, London, Ontario—*"has saved a tremendous amount of time by completely eliminating our retyping or rewriting the same information on the many forms necessary in our admittance records. It is fast, simple and eliminates copying errors."*

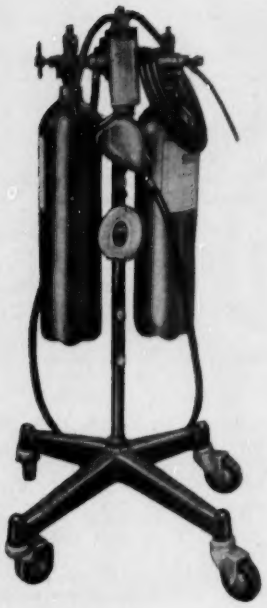
REVIV-A-LIFE
RESUSCITATOR

A COMBINATION RESUSCITATOR • INHALOR • ASPIRATOR • WITH CONTROLLED POSITIVE AND NEGATIVE PRESSURE

Adjustments are made at the patient, providing greatest ease of control. A single fingertip adjustment at the mask controls oxygen flow and the resuscitator-inhalor function.

Can be used for resuscitation or inhalation, and aspiration at the same time on two different patients. The REVIV-A-LIFE can also be used with piped-in oxygen. The REVIV-A-LIFE offers outstanding simplicity of operation, with maximum efficiency and new low cost.



The safe pressure of 14 mm. positive and 10 mm. negative, used to inflate and deflate the lungs of a newborn or adult in a rhythmic manner are pre-set at the factory, and cannot be altered by the operator.

Something *NEW* for the Classroom

• This is the new Table Model miniature skeleton which offers so many advantages for the training school. Made of extra durable plastic, this model is extremely realistic in both appearance and feel. Designed and modelled by experts in anatomy and osteology, this miniature skeleton shows all the major markings, and is completely articulated to show movement of all major parts. Only 26" high.

Life-Long FURNITURE is DURABLE and BEAUTIFUL

THIS cheerful, home-like private room group illustrates the simplicity of design that makes this furniture line so popular with hospitals and institutions everywhere. The electrically welded steel construction, and infra-red baked, multiple coat enamel finish ensures unusual durability . . . and lasting beauty that is wearproof and fireproof. Many ingenious sound-deadening devices eliminate all metallic harshness, ensure the quiet and peaceful environment so necessary for successful rest-therapy. Available in rich wood finishes and harmonious color schemes to suit any decor. Over two hundred items for varied budgets.

Write today for our catalogue No. 76, "Guide to Selection of Hospital Furniture".

Consider using . . .

STANDARDIZED RECORD FORMS

that are complete, authoritative, and economical. We have been furnishing our standardized forms to hundreds of accredited hospitals. They know the value of using forms developed through skilled planning and with the cooperation of the leading professional organizations.

Hospital Accreditation Scoring Report

designed by the American College of Surgeons and adopted by the Joint Commission on Accreditation of Hospitals in 1953. Ask for *Form A-603*. We include a four-page set of instructions which explains the scoring system and shows how you can determine your accreditation status.

RECOGNIZED ACCOUNTING RECORDS

which are part of the *Penn-Way System of Hospital Accounting* . . . designed to conform to the AHA Classification of Accounts. These specialized forms are reasonably priced, costing you less than custom-printed forms. We can also print any of your machine bookkeeping forms. Just send us a sample of your form for quotation.

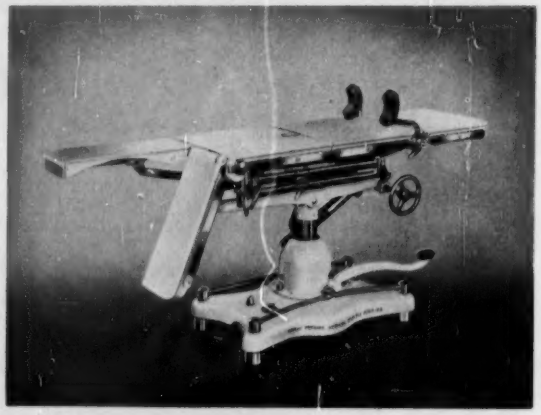
The "Emesay" Turning Frame overcomes the many difficult problems presented in cases suffering from burns and paralysis; in the post operative treatment of spinal and pelvic fracture and spinal fusion, and in any instance where it is necessary to maintain the patient immobile with an absolute minimum of handling.



Designed specifically for both Orthopædic and General Surgery, The "Plaistow Combined" is widely used, especially in view of the fact that orthopædic surgeons are now using open operation technique much more than previously.

It has a completely hydraulic base, unique in design and exceedingly mobile.

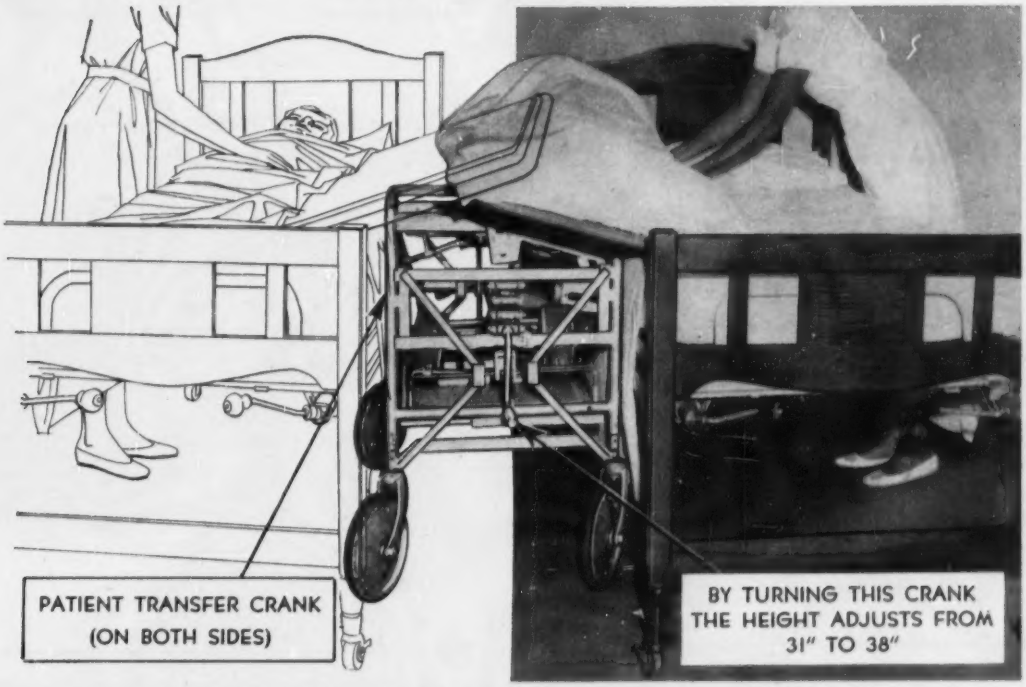
Canadian Distributors: THE STEVENS COMPANIES

THE NEW HAUSTED TWO-WAY SLIDE AND TILT "EASY-LIFT" WHEEL STRETCHER



An easy turn of the patient-transfer crank causes the top of this stretcher to slide over the bed and tilt to either side. No matter how heavy the patient or the position of the bed - one nurse can do the job.

We want to get right at the facts by saying that *Hausted stretchers will save money* wherever they are used.

First, let's look at the initial cost: It's true that you can buy a plain rigid wheel stretcher for less, in fact, we'll sell you one if you want it, BUT, every new Hausted stretcher, complete with attachments, will *do so many jobs* that when you add up all the old-fashioned equipment you'd have to buy to do all the things that Hausted stretchers will do, you'll immediately realize that a Hausted stretcher *actually costs much less!* Each of these multi-purpose stretchers saves money for a hospital.

Second: By using stretchers that will convert from one use to another, hospitals can and do save time and personnel. *Under today's overcrowded hospital conditions this saving is of most importance.* The Hausted "Easy Lift" stretcher that enables one nurse to do the job of many is one of the greatest labor-saving devices ever created for hospital use. Therefore, if you buy hospital equipment it would pay you in real dollar savings to investigate the Hausted line of multi-purpose wheel stretchers.

Standard Refrigerators are illustrated. We also build the refrigerator with a compressor compartment in bottom left hand door section for use as a self-contained style refrigerator.

Exterior finish: Refrigerators available in stainless steel entire or partial exterior and interior surfaces. Service doors: Refrigerators can be supplied with double glass or solid type sliding doors instead of swing type. This provides easy access to the refrigerator without using any room space in which to swing doors.

Pass-through refrigerators can be built to standard sizes and standard or custom specifications on order.

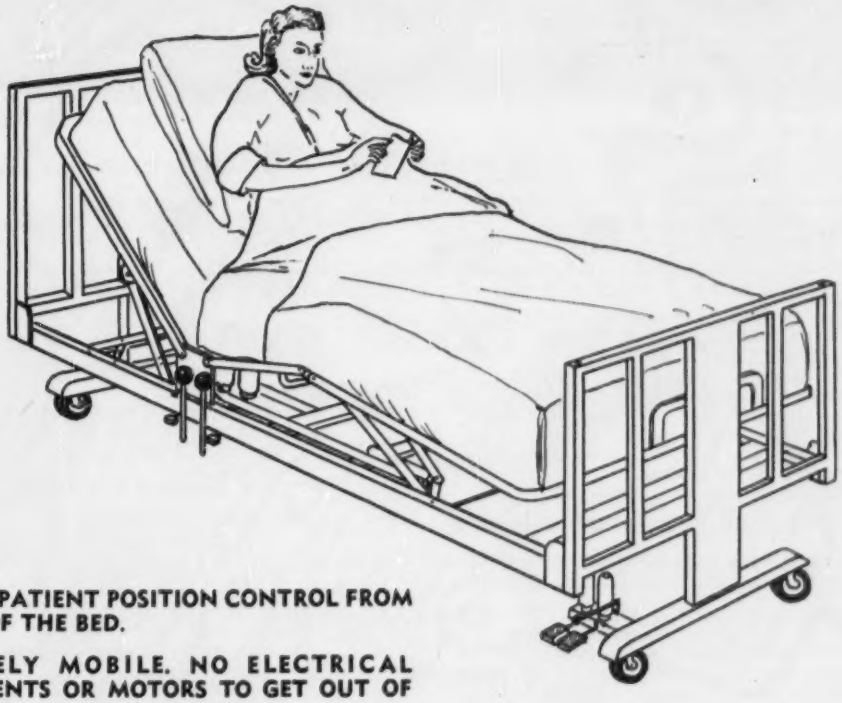
New HYDRAULIC HI-LO BED



★ COMPLETE PATIENT POSITION CONTROL FROM ONE SIDE OF THE BED.

★ COMPLETELY MOBILE. NO ELECTRICAL ATTACHMENTS OR MOTORS TO GET OUT OF ORDER.

★ BED ENDS MAY BE RAISED EITHER SIMULTANEOUSLY OR INDIVIDUALLY PROVIDING AN INFINITE NUMBER OF POSITIONS IN ACCORDANCE WITH SURGICAL AND MEDICAL REQUIREMENTS.

★ TO LOWER BED IT IS ONLY NECESSARY TO DEPRESS A LEVER FOR A SMOOTH CUSHIONED DESCENT.

★ OPTIONAL HYDRAULIC GATCH SPRING PROVIDES FOR SIMPLIFIED POSITIONING AND MAKES POSSIBLE THE CHAIR SITTING POSITION FOR CARDIACS.

★ PRICE NO MORE THAN THE MECHANICAL BED. THE COMBINED HYDRAULIC GATCH AND BED IS LESS THAN THE ELECTRICAL AND WILL PERFORM OPERATIONS NOT POSSIBLE IN ANY OTHER EXISTING BED.

Bassick Casters

AND GLIDES

in use on hospital equipment

BEDS · FURNITURE · NURSERY EQUIPMENT · LAUNDRY TRUCKS STRETCHERS · WHEEL CHAIRS TRAY TRUCKS · CABINETS OFFICE EQUIPMENT

On almost every item of hospital equipment that moves there is a type of Bassick Caster designed for that specific item—each assuring you easy rolling and swivelling quietness and complete floor protection. Bassick Casters, Glides and floor protection equipment are built for the longest possible number of years of economical, trouble-free service on all types of mobile hospital equipment.

"Specify . . . Bassick"

ON NEW EQUIPMENT

When ordering new hospital and office equipment be sure to insist on Bassick—your assurance of quality. Bassick is the largest manufacturer of casters and wheels in the British Empire.

MAKE SAFE PRACTICE EASY IN YOUR OPERATING ROOM

WITH

CONDUCTOMETER*

The ever present hazard of explosion caused by static spark, wherever combustible anesthetics are stored or being used, requires constant vigilance and observance of safe practices by all personnel in these locations. N.F.P.A. Booklet No. 56, June, 1952 "Safe Practice for Hospital Operating Rooms" recommends that all persons entering rooms where combustible gases are stored or will be used, wear conductive footwear, and measure their electrical resistance each time they are worn—that floors and equipment in these hazardous locations be similarly tested every month by the maintenance engineer.

These tests can be made quickly and easily, with CONDUCTOMETERS installed in operating room suites. The CONDUCTOMETER is specifically designed to test the resistance of personnel, flooring and equipment. It provides two separate circuits, one of 90 volts, used to test personnel without danger of shock, and the other of 500 volts for flooring and equipment testing. CONDUCTOMETER'S exclusive elbow switch permits personnel testing under aseptic conditions. The indicator scale is in color and is easily read. Testing electrodes and floor plates conform to specifications recommended in N.F.P.A. Booklet No. 56, June, 1952—Sections 6-2 (b) 1 & 13-5 (e).

CONDUCTIVE HOSPITAL ACCESSORIES CORPORATION

We are an affiliate of Federal Flooring Corporation, specialists in the installation of conductive static-proof flooring. Please see our catalog and that of our affiliate in Hospital Purchasing File.

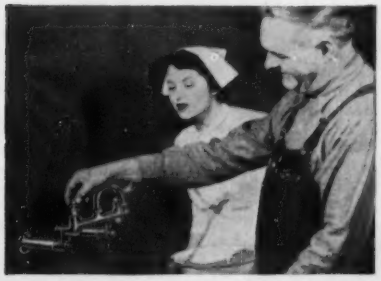
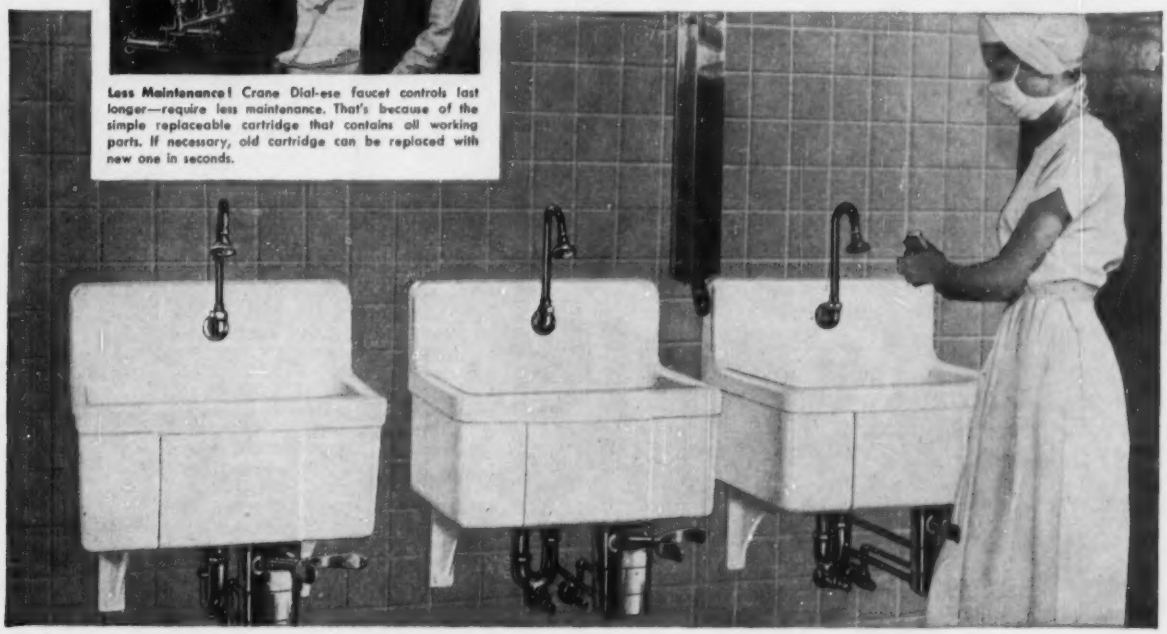
CRANE HELPS YOU SAVE NURSEPOWER

Nothing wastes more time in a nurse's day than plumbing fixtures that are too few, too far away, too difficult to operate. The right Crane equipment in the right places can save hours of nursepower every day. Designed with the help of hospital experts, Crane hospital fixtures are specifically made to meet hospital requirements. In height, size, shape, and in types of water controls, each fixture is precisely planned to eliminate lost motion, save time, make work easier. It will pay you to get acquainted with the complete line of Crane hospital plumbing.



Less Maintenance! Crane Dial-ese faucet controls last longer—require less maintenance. That's because of the simple replaceable cartridge that contains all working parts. If necessary, old cartridge can be replaced with new one in seconds.



For nurses who have their hands full (and what nurse hasn't?)

Crane knee-operated valves leave *both* hands free for those countless daily tasks at sinks and lavatories. Fitted with a combination hot and cold water control, this valve responds to the slightest touch of the knee . . . providing water that's all hot, all cold, or mixed exactly as wanted.

Promotes sanitation, too. No dirt or germs pass from one pair of hands to another.

For complete information about this and other Crane specialized hospital equipment, see your Crane Hospital Catalogue or call your Crane Branch, Wholesaler, or Plumbing and Heating Contractor.

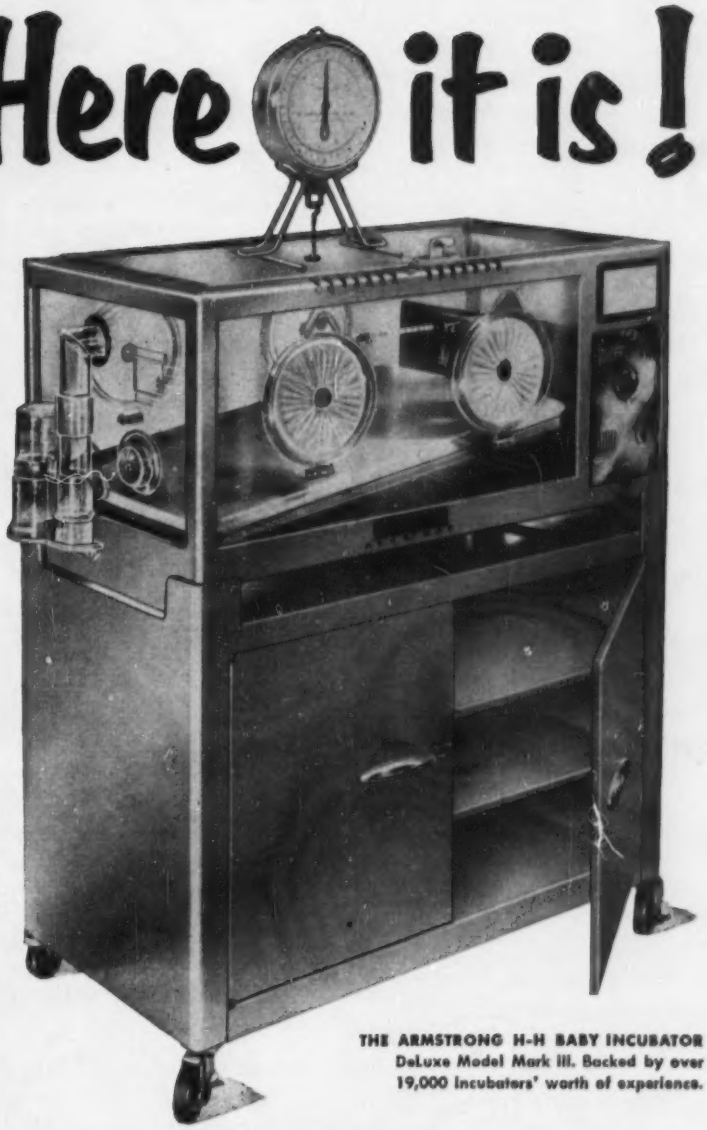
Here it is!

1. A BIG Armstrong H-H Baby Incubator.
2. 4-compartment mobile Cabinet.
3. 4 easy-opening, easy-closing, Hand Holes.
4. Self-purging Nebulizer for water or detergents, such as Alevaire.
5. Supersaturated atmospheres with or without Oxygen.
6. 3-stage normal humidity reservoir.
7. Slide opening for parenteral fluids or tube-feeding.
8. Additional directional-flow oxygen inlet.
9. Metal-shielded F & C Thermometer.
10. Adjustable, tilting, aluminum bed plate.
11. Foam rubber mattress with Vinyl plastic cover.
12. Automatic Fenwall Thermoswitch control.
13. Emergency opening Top Lid of ¼" safety glass.
14. ¼" clear Lucite ends and sides.
15. Extra set of Vinyl plastic hand-hole sleeves.
16. 2 pre-shrunk white duck weighing Hammocks.
17. Big enough for a 25 or 26 inch Baby.
18. Rigid steel frame for strength and long life.

All of the above, and more, at a new low price for a Hand-Hole Baby Incubator. Write for details and prices.



THE ARMSTRONG H-H BABY INCUBATOR
DeLuxe Model Mark III. Backed by over 19,000 Incubators' worth of experience.

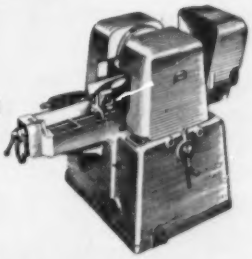
Part of the world's largest -and finest- range of Centrifuges..

-and 3 Homogeniser models

Of the twenty different MSE centrifuge-models many, both with and without refrigeration, are of direct interest to clinical, pathological, bio-chemical and bacteriological departments of hospitals, and research centres. Write today for your copy of MSE Bulletin 888 which gives a complete review of this outstanding laboratory equipment—including the MSE Homogeniser with temperature control facility, microtomes and automatic tissue processor.

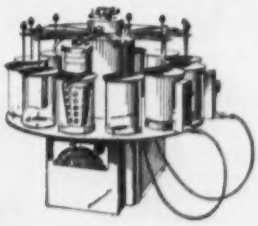
-plus 4 Microtome models

-and Microtome Knife Sharpener -streets ahead for safety and technique



This sharpener gives a dead true edge in 10 to 20 minutes, with a scientifically correct grinding principle by twin glass cup wheels. A continuous circulating system for lapping fluid is incorporated and knives of any section in lengths up to 350 mm can be accommodated. And it is SAFE in use—the knife need not be handled at all.

-and the HISTOKINETTE for completely automatic tissue processing



The "Histokinette" takes the entire routine of tissue processing out of the hands of the technician, making diagnostic reports available in far greater number hours sooner. It goes through the cycle of fixation, dehydration, washing or staining of tissues to their final setting in wax or celloidin. The technician goes off duty, but the "Histokinette" stays on the job.

4 easy ways to make hospital buildings more serviceable

1

When doors are in constant use, the *new Corbin heavy duty Cylindrical Locksets* offer special advantages. Their pin tumbler cylinders assure trouble-free, long service life. Seamless tubular knob shanks provide full torsional strength . . . designed to eliminate wobble. Full ⅛" bolt throw handles extreme door shrinkage. Installation is easiest type. These advantages are typical of many offered by Corbin Heavy Duty Cylindrical Locksets.

2

Where automatic door closing should be speed-regulated to fit the service, *Corbin "400" Door Closers* provide the answer. These precision-made, heavy-duty closers are the only closers with 4-speed control and "Silence Adjustment". Semi-concealed type has streamline appearance.

3

Where door holders are desirable, *Corbin "Triple-Grip" Door Holders* assure longer service life . . . fewer adjustments. Unique design provides twice frictional area of similar devices yet requires less pressure per square inch.

4

Where safety is paramount, *Corbin simplified Fire Exit Bolts* assure top performance. They have only 3 sturdy, positively-aligned moving parts. Levers are drop-forged . . . dogging device is foolproof.

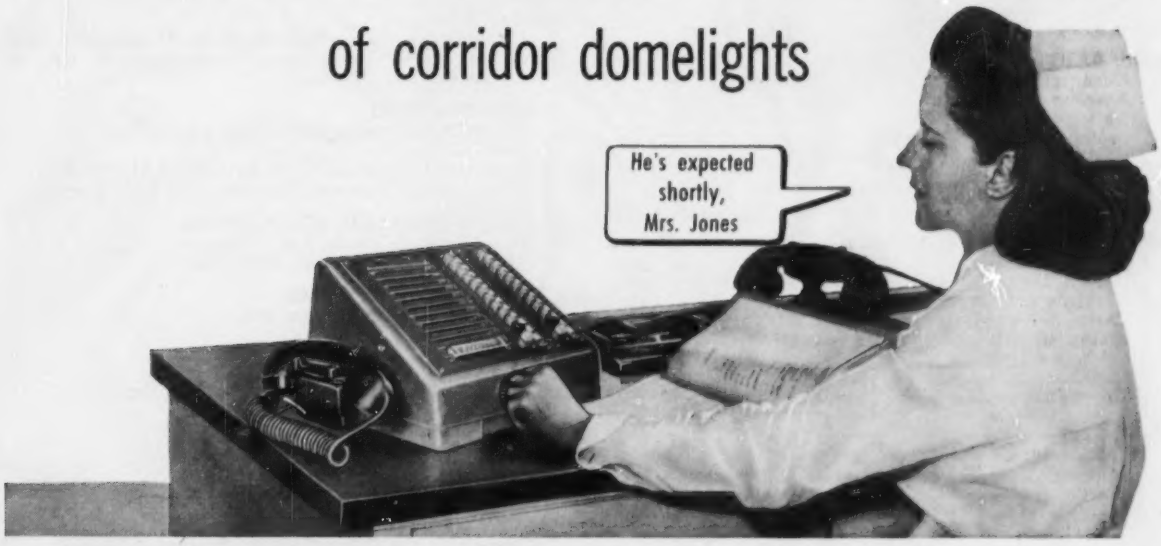
Add **AUDIO** easily to your present **VISUAL** nurse call system of corridor domelights



Executone's DEPENDABLE Audio-Visual Nurse Call System Cuts Foot Travel in Half!

Easily and quickly added to your present visual domelight system, Executone frequently uses *existing* conduits or raceways—providing you with a *modern* Audio-Visual Nurse Call System! All accomplished with no interruption of service during installation!

Many hospitals—old and new—are discovering the economy and efficiency of Executone's Audio-Visual system. More patients are handled with *less effort, in less time!* One hospital reports that Executone has reduced operating costs 8% per bed. *It is an invaluable aid in relieving the nurse shortage.*

By pressing a bedside button, the patient activates signals at three locations—chime and light on nurse's control station, corridor domelight, buzzer and light on duty stations. The nurse presses key to reply... Executone's Call System may be installed complete, added to existing domelight systems, or installed without domelights.

FOUR MORE *Executone* SERVICES

1. ***Radio-Sound Distribution System*** provides patient with entertainment programs through individual "pillow speakers".
2. ***Doctors' Call System*** locates doctors instantly, anywhere in the hospital.
3. ***Bed Occupancy Monitor©*** alerts nurses when a "bed restricted" patient tries to get out of bed.
4. ***General Administrative Intercom*** coordinates activities between departments and individuals.

Hospital authorities everywhere in Canada take for granted the unexcelled purity of Liquid Air medical gases—a reliability earned over more than 40 years of experience and pioneering in the gas production field.

Similarly, the top quality of L.A.'s equipment for hospital use goes without saying—attested by the scores of hospitals from the Atlantic to the Pacific in which such equipment is in daily use. L.A.'s hospital pipeline outlets and control equipment are in fact standard with more than 75% of all hospitals using pipelines.

If your hospital is not yet availing itself of Canadian Liquid Air Medical Gas Services, consult with the nearest L.A. Branch or write direct to Medical Gas Division, 1111 Beaver Hall Hill, Montreal, P.Q.

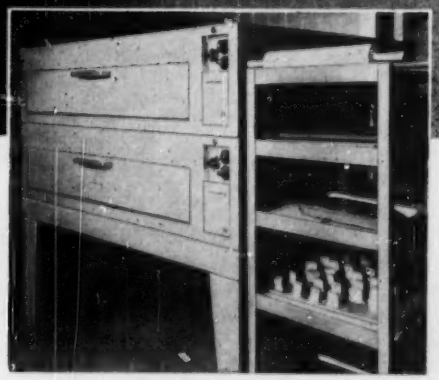
Hotpoint kitchen equipment chosen by

Pearson TB Hospital, Vancouver



Above is a general view of the Pearson T.B. Hospital kitchen showing part of the Hotpoint electric cooking equipment used to feed 123,456 patients. Units include, left to right, two all-purpose ovens, three Hotpoint Superranges, and two Fry Kettles.

Hotpoint all electric equipment is used to provide the entire cooking facilities in this hospital, including the two large bake ovens shown at left. Precision heat control and range of versatility make preparation of meals quicker and continuous quality easier to maintain.

RANGES, FRY KETTLES AND OVENS FOR ALL COOKING

Units of the Hotpoint Glamour Line of electric cooking equipment provide complete cooking facilities at this truly modern hospital.

Hotpoint Equipment leads in the institutional cooking field in Canada. Quick, efficient electric heat and a wide range of accurate heat control, not only assures better cooking results with Hotpoint, but does the job at lower overall costs. Their sturdier construction assures longer unit life.

For further information on the wide range of Hotpoint electric cooking units, see your nearest C-G-E Commercial Cooking Dealer, or contact Commercial Cooking Sales, 270 Evans Avenue, Toronto 14, Ont.

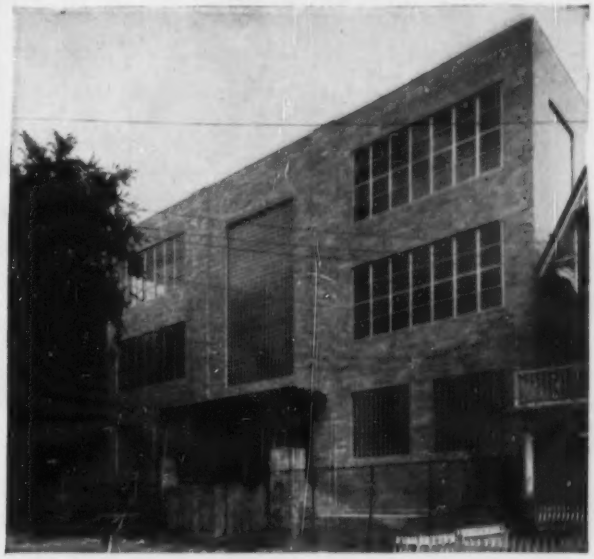
for a modern institution

SPECIFY CANADA'S MOST MODERN WINDOWS — RUSCO —



Front view of the addition to The Provincial Institute of Trades, Nassau Street, Toronto, being built by The Ontario Department of Education. Rusco Fulvue Windows are one of the many modern features of this new building.

CHECK THESE IMPORTANT

RUSCO ADVANTAGES

✓ Exclusive Magicpanel ⑦ year 'round rain-proof, draft-free, filtered-screen ventilation.

✓ Built-in waterproofed felt weather-stripping makes Rusco Windows completely weathertight.

✓ Positive automatic locking in all open and closed positions.

✓ Smooth, effortless operation. Rusco Windows are precision-built. Sash sections slide up and down in a felt cushion—easily, quietly, without effort.

✓ Made of triple-protected galvanized steel for strength and minimum maintenance requirements. Zinc-treated, bonderized and finished with baked-on outdoor enamel.

✓ Glass panels removable from *inside* for easy, safe cleaning.

FOR NEW CONSTRUCTION

Specify: THE RUSCO PRIME WINDOW

A completely pre-assembled window unit containing glass, screen, weather-stripping, insulating sash (optional) and wood or metal surround. Comes fully assembled, factory-painted, ready to install. Makes big savings in time and labor.

FOR MODERNIZING EXISTING BUILDINGS

Specify: RUSCO SELF-STORING COMBINATION WINDOWS

Installed without any alteration to present windows. Completely weather-proofs window opening. Provides rain-proof, draft-free, filtered-screen ventilation in every kind of weather. The world's best-accepted combination window—over 10,000,000 already installed.

Compare the end cost of Rusco Prime with that of any other window

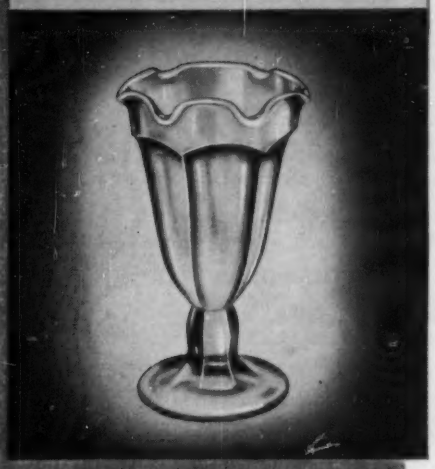
Here come the months of sundaes

MAY



TULIP SUNDAE —an all-time favourite. As made by Dominion Glass these are crystal-clear, sparkling, economically priced. Come in 4½ and 6½ oz. sizes.

JUNE

SUNDAE—this attractive shape comes in 3¼ oz. size. Clear glass, handsomely fluted. Ask your Glassware Distributor for prices. You will be pleased at the small cost.

JULY

SUNDAE—this 4¼ oz. size makes the serving look big. With an extra sturdy stem, this is a gleaming, quality glass, reasonably priced.

AUGUST

FOOTED SODA —popular with younger customers. Durable, with a high lustre. Dominion Glass sodas cost you less. Come in 12 oz. size only.

So now is the time to build up your stock of fountain glassware!

Cut your glassware costs

and make more profit from your ice-cream business by using low-cost Dominion Glassware. You will find all the shapes and sizes you want in the big range of quality pressed glassware made by Dominion Glass. It is sturdy, high lustre, and has a sparkling crystal clearness that adds appetite appeal to the sodas and sundaes you serve. Ask your Glassware Distributor to show you this attractive, economical line.

Johnson's Wax offers...

YOUR BEST BUY in no-buff floor finishes

Johnson's Shur-tred

For floors that must be extra safe!

Shur-tred positively reduces slip hazards on all types of floors! Requires no change in your present maintenance procedure. No other safety finish offers Shur-tred's combination of features! Brightest shine! Toughness! Wet-mop-proof! Quick drying! Full protection! Easy application! *Not* tacky or gritty!

Johnson's Brown Label *highly water-resistant!* and Johnson's Green Label *low-cost but durable!*

Both these no-buff finishes are quick drying, easy to apply, and give an exceptionally high shine —what ever the floor surface. The high water-resistant property of *Brown Label* especially recommends it for heavy traffic areas where repeated moppings, water spotting, etc., present a problem. The extreme economy of *Green Label* makes it particularly suitable for floors that must be scrubbed regularly.

Johnson's Traffic Wax *cleans as it waxes...buffs to a hard, sparkling finish!*

Johnson's Traffic Wax is a top-quality solvent-type buffing wax made especially for use on wood, linoleum, cork, concrete and terrazzo floors. Buffs to a tough, brilliant luster that's hard to mar, very easy to clean. Available in paste or liquid form.

Johnson has a complete line of top-quality waxes, finishes, and cleaners. For information on any Johnson product, write to:

Brantford, Ontario

PELLA LIGHT-PROOF SHADES

- *The choice of many hospitals*
- *Reasonably priced*
- *Easy to erect and operate*

COMPACT HOUSING . . . SMOOTH ROLLING

Pella Lite-Proof Shades roll up onto a spring-actuated, ball bearing roller inside a compact metal housing which measures 2⅛" to 2⅞" square depending upon length of shade.

PERFECT TAUTNESS

Stiffening bars are used on all Pella Lite-Proof Shades. These bars fit across the shade so it will not bag or pull from guides. Stiffeners project into the side guides and roll up with the shade into the housing.

TIGHT CONTACT WITH SILL

Spring catches grip both ends of operating bar. No distracting light rays leak through at sides or sill.

ENDLESS CORD PULLS

make operation by nurses easy.

Used at: Hospital for Sick Children, Toronto; New Mount Sinai Hospital, Toronto.

For Finishing Of ...

UNIFORMS, DUCK COATS and PANTS

depend on Pantex

Two specific features make it possible for you to depend on Pantex Utility Apparel Presses for the good, high-speed finishing. The first is the "king-sized" buck design that makes long lays quick and easy. Pantex design also permits most short-coat garments, such as pajamas and butcher coats, to be done double lay.

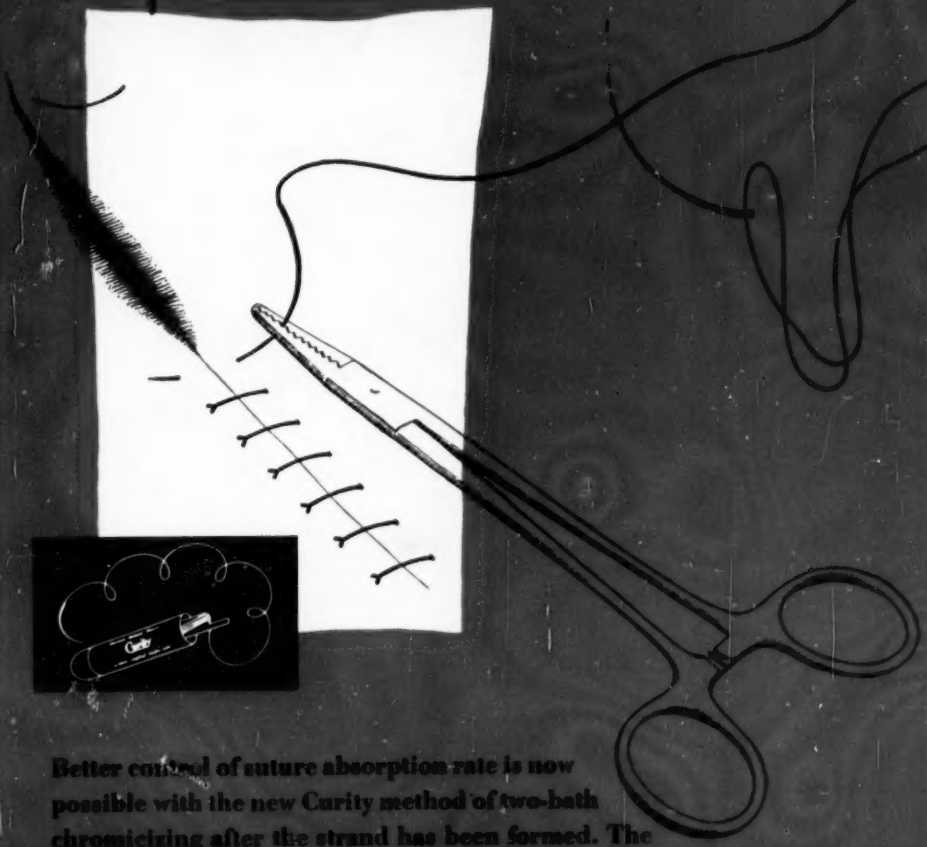
The second big feature is the fact that Pantex Presses *don't have the gadgets that cause 85% of laundry air press down-time troubles.* There's no cams, packings, diaphragms, push buttons and multiple air cylinders and hoses!

Among many desirable features, Pantex offers *dynamic leverage, two-hand safety controls, single air cylinder, master valve, air hose, and hydraulic oil cushion*—in addition to *tension springs* and *automatic pressure adjustment* between head and buck. For descriptive literature and suggested unit layouts, see your Pantex Representative today.

PANTEX MANUFACTURING (CANADA) LTD., 3556 St. Lawrence Boulevard, Montreal 18, Que.

Curity TRADE MARK chromic sutures

are chromicized with two baths for dependable absorption



Better control of suture absorption rate is now possible with the new Curity method of two-bath chromicizing after the strand has been formed. The first bath *does not* "*tan*" but permeates the strand. The solution used in the second bath combines with the molecules of the first, within the strand, achieving total, even chromicization from rim to center. As a result absorption is similarly uniform. By this method the plies are bonded by their natural mucin.
